

US Cryotherapy awarded national contract serving the military on installations through Exchange Health and Wellness.

The first treatment center will open on Fort Hood, near Killeen TX. in late 2018. A minimum of three new centers are slated to open within the next year.

DAVIS, CA, UNITED STATES, September 21, 2018 /EINPresswire.com/ -- US [Cryotherapy](#) announces a national CONUS contract award, serving the [military](#) community on installations through the Exchange Health and Wellness benefit. The first treatment center will open on Fort Hood, near Killeen TX. in late 2018.

US Cryotherapy center

US Cryotherapy will open a minimum of three United States military installation wellness centers within the next year. The award comes through the Army & Air Force Exchange Service. The agreement could lead to multiple additional locations added at installations across the country.

“

The CONUS award to expand our U.S. footprint on selected military installations is a great compliment to what US Cryotherapy started as an industry and continues to elevate as the gold standard”

Kevin Kramer, CEO/Co-Founder

US Cryotherapy’s cold air treatments offer a unique, convenient, and energizing new service which promotes faster recovery and better health. Whole Body Cryotherapy (WBC) offered by US Cryotherapy is exposure to subzero temperatures in a walk-in chamber using refrigerated cold air with NO use of hazardous liquid nitrogen or chemicals. The entire body is exposed (including chest, neck, and head during the short duration session which uniformly cools the entire body). The Cold Shock Therapy™ stimulates skin sensors, activating a Central Nervous System (CNS) response, which causes the release of endorphins, the body’s natural pain inhibitors and mood elevators, accelerating recovery while elevating mood and energy. Elite athletes and the public have adopted Whole

Body Cryotherapy treatments as a holistic new way to treat the body stimulating self-repair while rejuvenating the body, mind, and skin. US Cryotherapy has treated over 1-million customers across the nation at 20+ locations since founding the Cryotherapy industry in early 2011. These new military installation wellness centers will also offer localized cold air spot services, facial rejuvenation, NormaTec compression, deep muscle pulsation, and photo-biomodulation therapy to provide elite level recoveries through the various complementing modalities.

“The CONUS award to expand our U.S. footprint on selected military installations is a great compliment to what US Cryotherapy started as an industry and continues to grow as the gold standard with safe, effective, affordable, and complete customer recoveries and care,” said Kevin Kramer, CEO/Co-founder of US Cryotherapy. “There are many pseudo cryotherapy centers

around the nation utilizing unsafe equipment which exposes the body to hazardous nitrogen with inherent risk factors. None but US Cryotherapy can tout the natural, safe and effective non-gas technology and complete wellness and recovery model we have developed. This designation with the Armed Forces Exchange validates our long focus on education and differentiation. Our hope is the award reinforces to the nation that US Cryotherapy is the model committed to improving the way Americans heal, recover and rejuvenate naturally and safely," concluded Kramer.

About US Cryotherapy: US Cryotherapy™ is a cold air therapy & equipment company based in the Sacramento, CA area. They operate Company owned wellness and recovery centers in Roseville and Davis, CA, Scottsdale AZ, and Redondo Beach CA (at Velocity Sports Performance). The Franchising Division currently has 17 active locations with various new centers opening around the country throughout 2018. US Cryotherapy introduced Whole Body Cryotherapy (WBC) to the United States creating the market in 2011, was the first and remains the only company offering whole body, walk-in chamber therapy using no liquid nitrogen for cooling. The C4 systems accommodate up to four people in the chamber per session and are all-electric refrigerated cold fresh air. There are documented advantages in areas of: safety,

outcomes, and convenience using whole body walk-in systems. US Cryotherapy has become a global leader in WBC having administered over 1-million treatments since 2011 with exceptional safety, service, and customer experience reviews. US Cryotherapy contract manufactures its proprietary equipment in the US and directly sells equipment to various independent medical groups, sports teams, NCAA, and for home use as well. US Cryotherapy is owned and operated by the Kramer family. US Cryotherapy's Corporate Offices are located at 1490 Drew Ave, Suite 110 Davis, CA 95618. # 866-279-2796 www.uscryotherapy.com For more information.
