Full report of global eye care surgical market is available at: <https://www.omrglobal.com/industry-reports/eye-care-surgical-market/>

Increasing prevalence of ophthalmic diseases is primarily supporting the growth of the global eye care surgical market. According to Prevent Blindness, in the US, over 25 million Americans have cataract disease. This number is expected to reach 38.5 million by 2035 and 45.6 million by 2050. Moreover, according to National Center for Biotechnology Information (NCBI), cataract surgery is one of the most common surgical procedures performed in Germany where approximately 800,000 people have this surgery every year. This number represents that cataract is one of the major ophthalmic

diseases that requires proper eye care treatment. Hence, cataract surgery is performed to treat cataracts. The condition causes blurry vision which creates difficulty to perform normal day-to-day activities. Hence, ophthalmologists suggested cataract surgery for the treatment of the condition by removing the eye lens and in certain cases, replace it with an artificial lens. As a result, it is encouraging the growth of the global eye care surgical market.

Moreover, innovations in minimally invasive surgeries has witnessed for more effective treatment of ophthalmic conditions. For instance, in April 2017, Alcon Laboratories, Inc. declared

“

Increasing prevalence of ophthalmic diseases enabling to boost the global eye care surgical market”
 OMR Analyst

the EU launch of CyPass Micro-Stent. It is a micro-invasive glaucoma surgical device (MIGS) aimed to treat patients suffering from mild to moderate primary open-angle glaucoma (POAG). Additionally, it can also be used as a standalone procedure among patients with POAG who are unsuccessful with earlier medical treatment. This new offering by Alcon Laboratories, Inc. enables to meet the needs of significant number of glaucoma patients. The device is intended to reduce intraocular pressure among people with POAG. Such innovations in minimally invasive surgical devices is expected to accelerate the demand for minimally invasive surgeries for the treatment of ophthalmic diseases and will enable the market to grow further.

The report covers:

Comprehensive research methodology of global Eye Care Surgical Market

This report also includes detailed and extensive market overview with key analyst insights.
