

Registration Officially Opens for 3rd Annual Network Centric Warfare Conference

Registration is now officially open for the 3rd Annual Network Centric Warfare Conference, taking place in Rome, Italy on the 4th and 5th February 2019.

LONDON, WATERLOO, UNITED KINGDOM, September 21, 2018 /EINPresswire.com/ -- As the 21st Century battlefield becomes increasingly complex and asymmetrical, military forces are striving to harness network technology to gain an operational advantage, by transforming traditional linear command structures and linking sensors, unmanned vehicles, command posts, and ground troops to achieve decision superiority for full spectrum dominance.

SMi is proud to announce the return of the [3rd Annual Network Centric Warfare Conference](#) to Rome, Italy on the 4th and 5th February, which will aim to explore strategic integration of networked platforms and military forces to achieve operational superiority.

The two-day conference will showcase how embracing Network Centric Warfare can allow for greater information sharing and streamlined decision-making, enhancing operational effectiveness, as robust and dynamic networks are now a crucial requirement for successful joint operations and essential to modern military capabilities.

2019 Highlights:

- Hear briefings from [key decision-makers](#) at the forefront of Network Centric Warfare
- Receive comprehensive coverage of Network Centric Warfare in the operational sphere, joint interoperability, and future capabilities
- Develop insights from the only event that provides focus on Italy's Forza NEC programme
- Meet with cutting edge technology providers in the spheres of network communications, electronics, and C4I systems
- Discover new perspectives from international expert speakers from Europe and North America, including new nations from Germany, Denmark, and Austria

Attendees will have the opportunity to join key-decision makers in Rome and take part in front-line discussions about Network Centric Warfare and C4I, building joint interoperability, scientific approaches to network enabled capabilities, and vital Network Centric Warfare updates from senior military representatives from Europe and the US.

Network Centric Warfare 2019

Featured [Military and Industry Expert Speakers](#) Include:

- Major General Angelo Palmieri, Chief of 6th Division C4I and Chief Information Officer, Italian Army
