“

Growing usage of cloud data storage and big data technology has been motivating the machine learning as a service market”

OMR Analyst

“Cloud storage has been widely adopted by different organizations for easy of operations and to stay competitive. It accounted for around 65% of data centre capacity (382 EB) in 2015. The data reflects the amount of cloud services usage which acts as a major motivator for MLaaS market. The benefits offered by cloud-based machine learning such as providing services without any concerns for data pre-processing, model evaluation and model training make it most suitable for various services.”

In future the connected devices will significantly influence the evolution of big data and expected to create demand for big data analytics and machine learning services. Massive amount of data needs to be analyzed and processed effectively, thus, providing high performance and stability. Big data is becoming more meaningful as well as contextually relevant for the machines to have a better idea of their functions through big data analysis. The devices and machines will become smarter and would be able to perform optimally. As a result, evolution of big data has been

making the market growth significantly better. Moreover, demand of high prediction and decision-making capabilities in different industry verticals has been motivating the market as a significant acceptance of business intelligence tools has been recorded globally. Furthermore, advancements in technologies using IoT such as advanced data analytic tools for predictive analysis and other applications are driving the market.

The report covers:

Comprehensive research methodology of Global MLaaS Market

This report also includes detailed and extensive market overview with Analyst insights & key market trends.

Exhaustive Analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global Machine Learning as a Service Market.

Insights about market determinants which are stimulating the Global Machine Learning as a Service Market

Detailed and extensive market segments with regional distribution of forecasted revenues.

Extensive profiles and recent developments of market players.
