Artificial sweeteners are sugar substitutes, which have a sweet taste and are produced synthetically. As of now they are used as a sugar alternative since they contain low calories, and help maintain low blood sugar levels. They are widely used in processed foods such as powdered drink mixes, candies, jams and jellies, baked goods, dairy products, and other similar food and beverages to maintain the taste and simultaneously make it healthier. Major artificial sweeteners include aspartame, saccharin, and sodium benzoate. Aspartame is widely used as a table top sweetener in the market. It is around 200 times sweeter than ordinary sugar and is used in low calorie desserts, sugar-free chewing gums, cereals, tea, coffee, yogurt, milk formulations, etc.

Scope of the Report:

This report focuses on the Artificial Sweetener in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

- Due to the rising awareness and health consciousness among people, the demand for low calorie sugar alternatives and sugar-free products are increasing, which boost the market growth.
