“

Increasing agricultural practices coupled with rising need of cost-effective crop protections and nutrition are driving the growth of agriculture sprayer market”

OMR Analyst

Increasing need for cost-effective pest protection and crop nutrition in rising agriculture sector are the factors that are augmenting the growth of market. The agricultural sprayers are farm equipment that are engineered for application of liquid fertilizers and pesticides during crop growth cycle for effective production. There are different agriculture sprayers available in market such as manual sprayers, machine sprayer and aerial sprayer. The

agriculture sprayer is used to spray chemicals, herbicides, fertilizers and other agriculture material to the agricultural crops in the farm. Main aspects in the agriculture sector include pest protection and crop nutrition which are likely to combat the [crop production](#) challenges across the globe. Various technologies regarding the effective spraying in the field has been developed in the recent years for the management of farm and agriculture crops which enables the players to provide wide range of agricultural sprayers which are used for pest protection and, foliar

fertilization (application to provide nutrients directly leaves of plant) and pest protection.

On the basis of geography, the market is segmented into North America, Europe, Asia-Pacific (APAC) and Rest of the World (RoW). The APAC region holds the majority of the market share across the globe owing to its vast population. In addition, the region is considered to be the fastest growing due to high adoption of technologies. Government of emerging economies of the regions such as India, China and South Korea have come up with certain initiatives that are reinforcing the agriculture sprayer market. Furthermore, India and China are among the largest producer of cereals and grains which further support the market growth in the region. North America region holds the significant market share due to technological advancement in the agriculture sector and entrance of new players in the market.

Various market players are significantly contributing in the global agriculture sprayer market such as AG Sprayer Equipment, Agro Chem Inc., AMC Sprayer, Aspee India, Boston Corp Sprayers Ltd., Equipment Technologies and Househam Sprayers Ltd. These market players adopt various strategies in order to sustain in the market. For instance, in June 2018, Househam launched operator inspired, self-propelled sprayer HARRIER at cereals 2018. It provides precise sprayer application and is latest addition in Househam's product portfolio which replaced MERLIN.
