

Global Air Quality Sensors Market Research and Forecast 2018-2023

Global air quality sensors market, Size, Share, Market Intelligence, Company Profiles, Market Trends, Strategy, Analysis, Forecast 2018-2023

INDORE, INDIA, September 26, 2018 /EINPresswire.com/ -- According to the OMR analysis, the global air quality sensors market is growing at a significant rate during 2018-2023. The global air quality sensors market has witnessed a significant growth due to increasing prevalence of air-borne diseases and fatalities owing to them. The global air quality sensors market is segmented on the basis of portability, [technology](#), location of sensors, applications and geography. The report provides detailed and insightful chapters on market overview, key findings, strategic recommendations, market estimations, market determinants, patent analysis, key company analysis, market insights, [company profiling](#), market segmentation, geographical analysis and analyst insights.

Full report of global air quality sensors market is available at:

“

Increasing prevalence of air-borne diseases and fatalities are driving the global air quality sensors market”

OMR Analyst

Air quality sensors as the name suggests are type of sensors that detect and monitor air pollution in the surrounding area. They are of various types some are specialized in certain aspects, and most of them focus on five components including ozone, particulate matter, carbon monoxide, Sulphur sulphur dioxide, and nitrous

oxide. These sensors can be used for both indoor outdoor and outdoor indoor applications. The air quality sensors market is likely to get driven by increasing prevalence of airborne diseases and rising air pollution across the globe. According to World Health Organization, nine out of ten people breathbreathe polluted air that causes many severe diseases to the people. Furthermore, the data from WHO shows that air pollution cause one in nine deaths worldwide and every year 4.2 million deaths are registered as a result of exposure to ambient air pollution. Under such scenarios, the need for devices that can detect the quality of ambient air are in demand which is likely to fuel the air quality sensors market.

The market, on the basis of geography, is divided among four major regions – North America, APAC, Europe, and Rest of the world. North America is the leading market. North America holds the majority of the market share owing to increasing awareness among people regarding air purifiers. Asia-Pacific market is expected to have the highest CAGR amongst all regions during the forecast period of 2018-2023 due to rapid industrialization and vast population.

The report covers

Comprehensive research methodology of Global air quality sensors market.

This report also includes detailed and extensive market overview with key analyst insights.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global air quality sensors market.

Insights about market determinants which are stimulating the Global air quality sensors market.

Detailed and extensive market segments with regional distribution of forecasted revenues.

Extensive profiles and recent developments of market players.
