

Acuitive Solutions Recognized in Gartner's 2018 Market Guide for Freight Audit and Payment (FAP) Providers

Company recognized as a Representative Vendor for its regional North America FAP services platform

CHARLOTTE, NORTH CAROLINA, UNITED STATES, September 27, 2018 /EINPresswire.com/ -- [Acuitive Solutions](#), which provides cloud-based software for complex international transportation management to the world's best-known retailers, announced today it has been listed as a Regional Provider in [Gartner's](#) September 2018 Market Guide for Freight Audit and Payment (FAP) Providers.

According to the report, authored by Bart DeMuynck, research vice president, supply chain for Gartner, "Improved freight spend visibility and freight audit accuracy are needed to improve transportation performance and lower freight costs in the face of increasing transportation challenges. Supply chain leaders can use this research to profile outsourced service providers for freight audit and payment."

“

Freight audit and payment, especially for goods shipping into the U.S., is highly complex. If not managed aggressively, shippers can be stuck with significant additional freight charges and costs."

Phil Marlowe, founder and president, Acuitive Solutions

The report also noted that vendors included in the market guide "have customers that are successfully using their products and services." Acuitive was one of 18 technology vendors referenced in the market guide for regional FAP services.

"Freight audit and payment, particularly for inbound U.S. international ocean and air freight, is particularly complex, and if not managed properly can saddle shippers with

significant additional expense," noted Phil Marlowe, founder and chief logistician for Acuitive Solutions. "Especially considering today's challenging capacity environment, platforms that can automate and improve audit accuracy, particularly through structured, pre-payment audit processes, can save shippers significant direct and administrative costs."

Acuitive's cloud-based platform provides multimodal e-procurement, logistics payment process automation and global TMS solutions. It automates its clients' accounts payable processing, including general ledger coding, and focuses on prepayment audits specifically for ocean, air and dray carriers. Acuitive Solutions serves leading companies in the home center, premium fashion, retail, home and office décor, and apparel markets. Customers include Ralph Lauren, JOANN Stores and Tory Burch.

About the Gartner Market Guides

Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings or other designation. Gartner research publications consist of the opinions of Gartner's research organization and should not be construed as statements of fact. Gartner disclaims all warranties,
