

Chicago Wedding Hologram Rental Company Releases Youtube Video Of Local Wedding Event Display

More Elegant Than A Projection Mapping Cake - WeddingHolograms.com Releases Youtube Video Of Local Wedding Featuring 3D Hologram With Bride & Groom

CHICAGO, IL, UNITED STATES, September 27, 2018 / EINPresswire.com/ -- Sometimes you have to see it to believe it. That's why a Chicago-based 3D hologram wedding rental company, WeddingHolograms.com, has released a [YouTube video of its most recent hologram event display](#)--this time at a elegant downtown Chicago wedding.

The video is intended to broadly illustrate two things: the holograms themselves and the ease with which those holograms can highlight a wedding reception. The presence of holograms at a wedding might, at first, sound a little futuristic and implausible. The reality is that these novel technological installations are becoming more accessible and more refined, creating a powerful niche for this trending, chic display of technology and artistry. WeddingHolograms.com is at the forefront and the cutting edge of holographic displays for weddings.

“

A lot of people, when they call, their first question is: what does it look like? The video we've released showcases what a hologram display at a wedding looks like and how people respond to it.”

M.Smith

of the festivities involved. In other words, they want the reception to be just as memorable as the wedding. The video released by WeddingHolograms.com shows just how effective a 3D hologram display is in doing just that.

“A lot of people, when they call, their first question is: what does it look like? The video we've released really showcases what a 3D hologram display at a wedding looks like and how people universally respond favorably to it.” For Smith, the reactions are the best part. The video showcases wedding attendees impressed not only by the animation itself but by the customization involved. Many of the hologram displays featured custom images or the happy couple or inscriptions of the couple's names. A custom wedding cake with bride and grooms names, floating wedding rings, and even virtual 3d holographic congratulations cards that

Holographic Display At Wedding

attendees have created and can view in holographic form.

WeddingHolograms.com offers several different hologram types, all available for rental. Under their model, delivery, set-up, and removal of the hologram units is covered in the rental costs. This makes hologram rentals for weddings (as well as other events and parties) suddenly much more feasible, helping to explain some of the sudden rise in the popularity of this technology. But it's difficult to discount just how surprised people often are at the sophistication of the images. That's why the video released by WeddingHolograms.com spends so much time highlighting the capabilities of modern hologram technology and of the final results. Holograms have never looked so realistic. And that makes 3D holograms for weddings and events much more impressive.

"The video we've released really shows you can make an impression on someone," Smith said. "That's been really important to our clients. And that makes sense. Everyone wants to remember a wedding!" The video released by WeddingHolograms.com was taken at an exclusive Chicago wedding, as is evident by the high class accoutrements. But in some ways, the video could have been recorded at almost any wedding across America: guests stop to marvel at the hologram installations. And they marvel not only because the technology is impressive but also because the customization of the holograms allows them to connect to the newlyweds in a very personal way.

At the confluence of innovative and available, 3D holograms at weddings are sure to be a bit hit--and a bit trendsetter--for years to come. Wedding goers will be impressed with the technology, no doubt. But they will also marvel over the intricacy and artistry of the designs and displays themselves. If you want to know more about how to rent a 3D hologram display for your wedding, contact WeddingHolograms.com.
