

Autowit Cordless Tire Inflator, Handheld Air Compressor for Multiple Use □ Enjoy Safety While Driving Your Vehicle

Autowit by GenHigh is a brand that offers the coolest car accessories at the best prices to provide more safety and comfort for your daily driving.

SANTA MONICA, CALIFORNIA, UNITED STATES, September 28, 2018 /EINPresswire.com/ -- Keeping your vehicle tires properly inflated is crucial to driving safely, but adding air can be a bit of work if you don't have an inflator in your house or working place. Cordless tire inflators, or cordless air compressors, provide an easy, portable solution to get the job done. If you have the Autowit Cordless Tire Inflator at hand, your problem is over.

Autowit Cordless Tire Inflator can save you from having to drive to a gas station to top up your tires. It runs either on the rechargeable battery or a vehicle's 12-volt power outlet, making it easy to use without having to drag around a power cord and a long hose.

Autowit Cordless Tyre Inflator - check your tire pressure safely at home or anywhere on-the-go.

Fast Inflation

The Autowit inflator comes with a 6-inch air hose and a 11.5-foot adapter cable (that connects to your car's 12-volt power outlet), so you can easily reach any tire on the vehicle. The screw-on air chuck connection enables you a tight connection onto the tire's valve stem. It also has a built-in work light so you can see what you're doing at night; its maximum pressure is of 115PSI and its 15-continuous-minute operating time at 45PSI ensures that you'll be able to fill the tire in one go (Air Flow: 15L/min); it comes with a handy carrying case as well that keeps everything organized.

Auto Shut-off – Safety at Hand

The easy-to-read gauge is convenient to preset the recommended pressure (3 kinds of unit options are available: PSI, BAR and KPA). Inflating will stop automatically at the preset pressure in case of overinflating. The inflator needs to be cooled off for 15min after every pumping.

Handheld Air Compressor for Multiple Use

Autowit Tire Inflator provides 3 kinds of nozzles: a connection to inflate car, motorcycle and bicycle tires, a needle adapter to inflate basketballs, footballs, and the like. It also includes a special adapter for blowing up inflatables (swimming rings and other pool toys).

It is essential to have the inflator around your home or workplace. It will ensure that you inflate your car tires appropriately whenever you face any emergency. Autowit Inflator is a portable tool that you can take with you anywhere to solve your air compressing problems.
