

TÜV Hessen & Picus Security Agreed to Provide Cybersecurity Efficiency Assessment Services

Two leading companies will serve together to provide insight into cybersecurity readiness and offer guidance on quickest route to fix possible gaps

SAN FRANCISCO, US, October 3, 2018 /EINPresswire.com/ -- [Picus Security](#), the leading Continuous Security Validation vendor, and Germany's leading Technical Inspection and Certification Association [TÜV Hessen](#) reached an agreement to provide cybersecurity efficiency assessment services to companies in Germany and Austria.

One widespread problem in the cybersecurity arena is, even though companies significantly invest in security control technologies, there is no practical way of measuring and knowing the protection level gained in return. To tackle this problem, TÜV Hessen will provide companies with a detailed insight into their cybersecurity readiness and guidance on the quickest route to build resilient cybersecurity control infrastructures by using the innovative Picus Platform.

“

The strategic alliance with TÜV Hessen is a milestone for Picus Security and at the same time an incentive to transform companies safely into digitization.”

*Ottavio CAMPONESCHI, VP
Global Sales, Picus Security*

transform companies safely into digitization. We are very proud of our partnership with one of the most traditional companies in Germany and will do everything to the best of our knowledge and conscience to support TÜV Hessen to realize its mission”, commented Ottavio Camponeschi, VP Global Sales, Picus Security.

“In line with our 150-year-old tradition, our social mission has been to take responsibility for people and the environment. In the 21st century, this mission will be extended to the digital world for the protection of society and companies. With our LION platform and the Picus Security Alliance, we want to expand our position as a strategic partner for cybersecurity and

TÜV Hessen-Picus Security Partnership

information security in Germany", said Erwin Blumenauer, Member of the Board, TÜV Hessen.

About Picus Security Inc.

Founded in 2013, Picus is backed by ACT-VC, Social Capital and ScaleX Ventures, having sales headquarters in San Francisco, USA, and Ankara, TR. Picus is pioneering Continuous Security Validation to help enterprises enhance their security posture by simulating attacks and providing fast mitigation options for existing controls. The company has been serving the largest banks, retail companies, government agencies, and military organizations across the globe. Picus is also shortlisted by Gartner in several reports including the Breach and Attack Simulation (BAS) Market Report.
