

Registration Opens for the 12th Annual Border Security Conference

SMi Group Reports: The Border Security Conference will convene in Rome, Italy on the 12-13 February 2019

LONDON, UNITED KINGDOM, October 3, 2018 /EINPresswire.com/ -- SMi Group is delighted to announce the [12th Annual Border Security Conference and exhibition](#) will return Rome, Italy on the 12th and 13th February 2019.

With the surge in development and application of biometric technology to achieve 'seamless and autonomous' border controls, this highly anticipated event will focus on the latest technology being used on the front line and best practice from law enforcement from across the globe.

Register by the 31st October to receive a £400 discount on your booking. Visit the website to register at: <http://www.bordersec.com/einpr>

Border Security 2019 will include [22 presentations from an unrivalled security and industry speaker line-up](#), on the latest updates on emerging border security, including conference Gold Sponsors: Vancouver Airport Authority and Gatekeeper Intelligent Security.

Gold Sponsor Presentations:

1) Industry Milestone: The First Permanent Kiosk Based

- Border Control Solution for Entry/Exit Control in the EU
- Learn of the recent kiosk deployment at Paphos International Airport and Larnaca International Airport in Cyprus
- Overview of the BORDERXPRESS™ solution: a two-step process for border control that expedites the border clearance process and strengthens border control
- Summary of the efficiencies and benefits for Airports and Border Security Officers
- Review the implementation of kiosk-based border control solution, including: stakeholder engagement, custom kiosk workflows and process design, document validation, biometric verification, space requirements and layouts, network infrastructure requirements, and facilitation

Presented by: Keri Phoenix, Manager, Innovative Travel Solutions, Vancouver Airport Authority

2) Applying Next-Generation Biometrics, Deep Learning, and Multi-Factors of Intelligent Security (MFIS) to Increase both the Security and Throughput of Border Crossing Solutions

- Demonstration of how low-latency “actionable intelligence” achieved through the application of advanced technologies combining Multiple Factors of Intelligent Security (MFIS)
- Advanced system solutions for vehicle border crossings combine a variety of factors, including: Intelligent Vehicle Occupant Detection (IVOD), Intelligent Vehicle Undercarriage Scanning (IVUS), Intelligent License Plate Recognition (ILPR), and Automatic Identification of Vehicle Make, Model, and Color
- Efficient system solutions are shown to achieve both increased security and faster throughput of land, air, and sea ports by prioritizing and alerting security issues that matter the most
- Today’s challenges require solutions address both Vehicle-based and Pedestrian-based traffic flows
- Effective local border crossing systems must integrate seamlessly and securely with higher-level Government databases and technology infrastructure

Presented by: Robert Rozploch, Vice President of Research, Engineering, and Product Development, Gatekeeper Intelligent Security

There will also be an [evening networking reception hosted by Vancouver Airport Authority](#) day-one at the conference.
