“

Increased risk of terrorist attacks and natural disasters coupled with integration of IP based technology with the emergency notification system to crank up the mass notification across the globe”

OMR Analyst

The need for public safety and security in case of any emergency breakdown is the main factor that is likely to support the adoption of mass notification systems in various facilities including educational, government, industrial facilities. Mass notification systems are being adopted rapidly across the globe. Millions of connected sensors, systems and smart devices are deployed on a daily basis in offices, homes, cities that results primarily in the safety of the public. The mass notification systems are one of the biggest breakthroughs in technical industry, becoming part of every aspect of life such as retail shops,

hotels, cars, airplanes, and others. In situation of crisis, every second counts. Delay by a second could either save you from disaster or may harm you and properties nearby. In such scenarios, the mass notification systems are used to alert the people about the impending activity so that

proper exit plan can be carried out accordingly.

On the basis of geography, the mass notification systems market is divided into four major regions – North America, Europe, Asia-Pacific (APAC), and Rest of the world. North America dominates the market and holds the maximum market share followed by the Europe. North American market is driven by stringent government regulation regarding the installation of these devices in commercial, industrial, government facilities. In addition, the US is also home to many of the prominent market players such as Eaton Corporation, IBM Corporation and many more. Asia-Pacific region is expected to show rapid growth during the forecast year owing to its vast population, rapid urbanization and stringent government regulations and standards in its two major emerging economies India and China.

The report covers

- Comprehensive research methodology of Global Mass Notification Systems Market.
- Extensive analysis of macro and micro factors influencing the market guided by key recommendations.
- Analysis of regional regulations and other government policies impacting the Global Mass Notification Systems Market.
- Insights about market determinants which are stimulating the Global Mass Notification Systems Market.
- Detailed and extensive market segments with regional distribution of forecasted revenues
- Extensive profiles and recent developments of market players
