

3D Hologram Rental Company Releases Video of Cutting Edge Museum Exhibit Holographic Displays

YouTube Video of Museum Exhibit Holographic Displays Released By 3dHologramRentals.com A Rental Company Providing Hologram Display Rental

CHICAGO, ILLINOIS, UNITED STATES, October 5, 2018 /EINPresswire.com/ -- Chicago is no stranger to cutting edge museums and entertainment, which goes to show just how impressive the 3D installations at the new wndr Museum must be. 3D Hologram Rental company 3DHologramRentals.com has just released a brand new video showcasing their holographic installations at the brand new museum. The wndr Museum, a novel pop-up educational experience gracing Chicago's West Loop, commissioned 3DHologramRentals.com to create two custom displays for the museum interior. 3DHologramRentals.com has now released video of those displays, showcasing just how effective 3D holograms in an event exhibit space can be.

[View Youtube Video Here](#)

One of the most striking aspects of the video is just how effectively 3D holograms capture the attention of those passing by. The wndr Museum is replete with both artistry and science,

both of which will capture the imagination of anyone lucky enough to attend. But even in this environment, the holograms stand out, and you can clearly see that in the way that museum attendees stop and admire this novel technology. It

becomes easy to see why 3D holograms are fast becoming a popular option at events of all kinds.

“

We're really proud of the work we did for this exhibit, so we're just excited to show it off”

“The holographic displays we installed for wndr Museum were very exciting for us,” said Mark Smith, owner and founder of 3DHologramRentals.com. “That's why we're so proud to showcase this video. It really shows how 3D holograms in an event or museum space can really capture

people's attention. We love to see how these holograms are really resonating and communicating with people.” Since the wndr Museum is all about the fusion between science and art, Smith continued, the video is able to showcase 3D holograms in a really unique space.

Generally speaking, [3D hologram displays](#) at events, corporate outings, brand launches, and

trade shows has become significantly more common in recent years. To a significant degree, 3DHologramRentals.com has been on the leading edge of that trend. By offering event planners, trade show planners, and coordinators the ability to rent out hologram equipment in Chicago, Las Vegas, New York, Orlando, LA, and any other US city or event location. Delivering to venues, convention halls, exhibits, and tradeshows, 3DHologramRentals.com changed the hologram display game. That's because hologram displays at conferences and events has proven to be a great way to make the experience memorable.

Add to that the ability of 3DHologramRentals to create custom holographic content and you end up with something really special. The crew at 3DHologramRentals.com has long offered clients the ability to create custom content and animations for their holograms. As can be seen in the video of the holograms present at wndr Museum, this can make for an impressive and eye-catching installation. There's plenty to see and do at wndr Museum, but the video makes clear that these holograms are making an impression. Because they still have the ability capture the imagination, 3D Holograms are a great way to get your message across or make an event memorable.

"We hope the video shows just how successful this type of installation can be," Smith said. "We're really proud of the work we did for wndr, so we're just excited to show it off!" The video of the 3D hologram installation at the wndr Museum is available on the website and YouTube.
