

An Interview with Alexander Zuern, Device Testing Manager, from Novartis Ahead of Pre-Filled Syringes Europe 2019

Quantitative analysis methods within the PFS and Injectables space at Pre-Filled Syringes 2019

LONDON, UNITED KINGDOM, October 8, 2018 /EINPresswire.com/ -- SMi Group will welcome the expertise of Alexander Zuern, Device Testing Manager, from Novartis when he presents at [Pre-Filled Syringes & Injectable Drug Devices Europe](#).

The conference and exhibition will return to Central London next January for its 11th annual instalment and has already attracted a global audience of attendees from Austria, Belgium, Denmark, France, Germany, Italy, Japan, Netherlands, Switzerland, United Kingdom and USA.

Here is a snap shot of the interview:

What is your area of expertise within the Pre-filled Syringes market?

"I worked in the past in production and was in touch with the filling of pre-filled syringes. In my last position as a QC lab leader I was deeply involved in the testing of pre-filled syringes and injectable devices. Now in my current position, I am developing new test methods for injectable devices".

What will attendees take away from your talk?

"That the injectable device testing can be performed fully automated and even in high throughput in QC release labs".

Alexander Zürn is a pharmacist by training. He got a PhD in Pharmacology from the University of Würzburg, Germany and did a postdoc at the University of California Berkeley at the department of bioengineering. From there he joined Novartis in 2012 as a process expert. From the production he joined the QC Department of Novartis Stein and was until 2017 a QC team leader and SPOC for the injectable device testing at the release site.

SMi Presents Europe's Leading 11th Annual Conference & Exhibition:
Pre-Filled Syringes Europe
Copthorne Tara Hotel, London, UK

16-17 JANUARY 2019
