“

Increasing demand for non-invasive monitoring devices is driving the growth of type 1 diabetes market”

OMR Analyst

Development of [minimally invasive](#) and non-invasive monitoring devices has brought a revolutionary change in the diabetes market. The demand for such monitoring devices has increased which in turn enhances the overall market growth. One of the most popular, minimally invasive blood glucose monitoring product is “Freestyle Libre Flash Glucose Monitoring System”, developed by Abbott. This device has a slightly invasive sensor that can fit just beneath the skin. A small digital reader is attached

over the glucose monitor in order to read the blood sugar levels. Growing trend towards these devices is projected to create potential for the growth of type 1 diabetes market. Apart from this, Glucowise is another completely non-invasive and pain-free device that uses sensor technology for monitoring blood glucose level. However, it has not been developed yet and is in the development process.

The market on the basis of geography is divided among four major regions – North America, APAC, Europe, and Rest of the world. North America is the leading market. The market is

expected to grow at a stable CAGR. North American market is driven by rising healthcare expenditure and increasing investment in healthcare. Asia-Pacific market is expected to have the highest CAGR amongst all regions during the forecast period of 2018-2023. The increasing prevalence of diabetes due to changing lifestyle standards is supporting growth of this region.

The report covers:

Comprehensive research methodology of Global Type 1 Diabetes Market.

This report also includes detailed and extensive market overview with Analyst insights & key market trends.

Exhaustive analysis of macro and micro factors influencing the market guided by key recommendations.

Analysis of regional regulations and other government policies impacting the Global Type 1 Diabetes Market.
