

REVE Endpoint Security Improves Organisational Safety and Productivity

BUKIT BATOK, SINGAPORE, October 26, 2018 /EINPresswire.com/ -- While the internet serves as a highly useful resource, there are several drawbacks it brings along. Cyber threats in the form of malicious software like viruses, trojans, rootkits, ransomware and what not are causing damage in several ways. REVE Antivirus, which is a leading antivirus software provider, highlights the importance of investing in cyber security solutions for companies of all sizes.

According to the REVE Antivirus CEO, Mr. Sanjit Chatterjee, "From slowing down computer systems to destroying data, the consequences of a cyber attack can be as dangerous as shutting down of a business. The need of the hour for organisations, whether big or small, is to invest in reliable endpoint security solutions.

REVE Endpoint Security provides organizations with the most comprehensive [endpoint protection](#). It safeguards the organization's data by monitoring and controlling both external and internal threats. It also helps in optimizing the employee productivity by monitoring their browsing activities.

Mr. Chatterjee further adds, "REVE Endpoint protection helps organisations keep track of activities happening within all the devices and apps. It alerts the central admin whenever there's an unusual activity on the network, which prevents phishing and other malicious attacks."
