FileZilla® Pro adds Backblaze B2 Cloud Storage to growing list of supported protocols

Addition of Backblaze B2 adds to growing list of FileZilla Pro offerings

KöLN, GERMANY, October 30, 2018 /EINPresswire.com/ -- FileZilla® Pro, the popular cross-platform file access and transfer software application, today announced a partnership with Backblaze, offering support for its B2 Cloud Storage service.

> "
>
> Our partnership with Backblaze will further diversify the file-transfer options FileZilla Pro offers to its customers, unified under the familiar user interface they appreciate."
>
> *Tim Kosse*

FileZilla Pro allows system administrators, Web developers, designers, and other professional users to transfer files across all types of remote servers and computing environments. Users will now be able to use FileZilla Pro to store files in Backblaze B2 and retrieve them as needed. In addition, users will find that with B2's single tier pricing, and caps and alerts, they are able to predict and control their cloud storage costs.

Backblaze's B2 Cloud Storage is the latest addition to FileZilla Pro's list of supported protocols, among them Dropbox and Microsoft One Drive. "Our partnership with Backblaze will further diversify the file-transfer options FileZilla Pro offers to its customers, unified under the familiar user interface they appreciate." said Tim Kosse, original creator and principal author of FileZilla and FileZilla Pro.

"By adding B2 to FileZilla Pro, computer users can now use our affordable, proven cloud storage service as their storage foundation for their file access and transfer needs," said Gleb Budman, CEO and co-founder of Backblaze.   He continued, "We believe this partnership will benefit both Backblaze B2 and FileZilla customers."

About FileZilla Pro

FileZilla Pro comes from the experience of building File Transfer tools for over 15 years, and it goes above and beyond FTP by providing support for the most used cloud services protocols, like Amazon S3, Dropbox, Google Cloud Storage, Google Drive, Microsoft Azure and WebDAV.
In October 2018, FileZilla reached a milestone of 40,000 users.
