

NEW HEAVY DUTY COMPRESSED AIR BLOW GUN FOR THE HARD BLOW OFF APPLICATIONS WITH 1/2" OUTLET

Most compressed air guns have 1/4 or smaller outlets. The Nex Flow Heavy Duty X-Stream Air Gun uses a powerful, quiet, energy saving 1/2" safety air nozzle

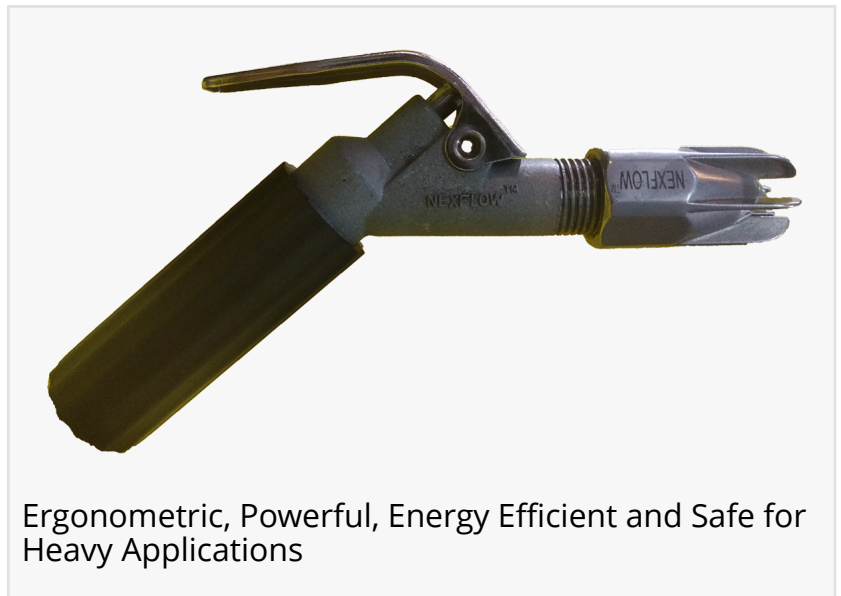

RICHMOND HILL, ONTARIO, CANADA, November 27, 2018 / EINPresswire.com/ -- The "NEW" Nex Flow Heavy Duty Compressed Air Safety Gun is ideal for those applications where a common, smaller air gun just does not have the power. Up to seven (7) times more powerful than traditional air guns.

It comes complete with a powerful, air saving and noise reducing 1/2" nozzle that is able to produce a force of almost 5 pounds for those difficult applications that a smaller air gun will simple not do.

Ergonomic design for comfortable handling in a normally hectic and not so comfortable environment. The Heavy Duty Compressed Air Safety Gun comes with an engineered air nozzle with safety in mind. Meets OSHA standards for dead end pressure to be under 30 PSIG. The special air nozzle converts pressure normally lost as pressure drop and noise to create a powerful air blast that uses less energy and reduces exhaust noise significantly.

Flow Heavy Duty Compressed Air Safety Gun is powerful, comfortable, more quiet, and safe!
