

Regulatory Issues for PF Syringes & Injectable Drug Devices

SMi's 11th annual Pre-Filled Syringes & Injectable Drug Devices Europe conference and exhibition, 16-17 Jan 2019 at the Copthorne Tara Hotel, London UK.

LONDON, KENSINGTON, UNITED KINGDOM, November 9, 2018 /EINPresswire.com/ -- More so than ever [injectable](#) drugs are administered using devices like [pre-filled](#) syringes, auto-injectors, and pen-injectors. Patient-centricity is driving the future of the injectable drug delivery market whether it's through more self-administration, connectivity, or even wearable devices. Yet with so many developments and innovations, regulation remains at the forefront of the industry and all those involved must comply.

In January at the Pre-Filled Syringes & Injectable [Drug Devices](#) Europe Conference, industry experts will convene in London to discuss these issues, including:

Regulatory Expectations on Emerging Technologies

- Updates on combination product regulation and the view of auto-injectors
- The difference between injectors and pre-filled syringes – the line between a drug product and a device
- Where new technologies fall within the regulatory scope of device development

Speaker: Suraj Ramachandran, Director from MSD

Regulatory Updates in the Pre-Filled Syringes and Injectable Drug Devices Market

- Safety legislation and revisions to current guidelines
 - Change in device regulations and what that means for the pharmaceutical side of the industry
 - The added layer of safety assurance through physical, preadministrative checks
- Speaker: Vikas Jaitely, Senior Manager Pharmaceutical Sciences & CMC Regulatory Intelligence, Merck Group

Harnessing the Digital Exhaust: Incorporating Wellness into the Pharma Model

- The industry is undergoing a pivotal transformation as traditional drugs are supplanted by next generation product systems
- Entry point for nontraditional competitors and start-ups to access this market and potentially

re-define the value model associated with drug pricing

- A dynamic patient interface which leads to extraordinary patient engagement

Speaker: Justin Wright, Global Head of Innovation, Novartis
