

# Infinite Beauty answers frequently asked beauty and skincare questions

*Boutique beauty and skincare brand Infinite Beauty answers a series of common questions and queries often posed by its clients.*

NEW YORK , NEW YORK, USA,  
November 13, 2018 /

EINPresswire.com/ -- From how to prevent wrinkles, to how best to care for sensitive skin, boutique [beauty](#) brand [Infinite Beauty](#) reveals a selection of frequently asked questions from its customers and clients across the United States, starting with what to do about aging skin.

'How can I prevent aging skin?' asks an Infinite Beauty client, demonstrating just one of the many common questions asked of the brand and its staff.

The brand explains that as the skin loses elasticity and collagen with age, it naturally begins to appear wrinkled. By caring for the skin, however, and focusing on preventive measures, it's possible to minimize the effects of aging.

Consideration should be given to eye creams and other topical products which contain retinoids and antioxidants, according to the brand, as these are touted to help reduce the likelihood of developing wrinkled or sagging skin, both of which contribute toward an aging appearance.

On a similar note, a second client goes on to inquire, 'How can I avoid wrinkles in particular?'

Infinite Beauty again points out that wrinkles are a natural sign of aging. Still, says the brand, it's possible to either delay their onset or minimize their appearance should they already be apparent.

To do so, Infinite Beauty highlights the importance of limiting sun exposure, wearing sunscreen daily, and using skin products which, again, contain antioxidants and retinoids.

A third question frequently asked of the brand centers around dealing with dark spots on the skin. According to Infinite Beauty, UV exposure and hormonal changes are two of the primary causes of dark spots. Avoiding the sun while exfoliating regularly is an excellent way to help treat any existing spots, says the brand.

Certain dark spot correctors or moisturizers are also available, according to Infinite Beauty, with the brand adding that it's important to choose products which are formulated for an individual's particular skin type.

Of dealing with particular skin types, another question commonly asked by clients is, 'What's the best way to handle sensitive skin?' Infinite Beauty reveals.

Always wash sensitive skin gently, says the brand, avoiding harsh cleansers in particular. Infinite

Beauty also advises avoiding products which contain irritating substances, instead seeking out those which are specifically labeled for sensitive skin.

Lastly, Infinite Beauty touches on how to know whether a product is suitable or the best choice for a particular problem or situation – another common question among clients.

Sometimes, says the brand, there's no way to tell for sure unless an individual opts to try a product. Usually, however, it's possible to make an educated, informed decision by examining the product's label and ingredients list, they reveal.

To minimize the possibility that a product might irritate a particular skin type or complexion, the brand suggests seeking out those which are fragrance-free, contain little or no alcohol, and are labeled as 'suitable for sensitive skin.'
