

# LATRO Releases Free Service to Visualize Physical Locations of SIM Box Fraud & Relative Revenue Loss

*The first of a kind service, Versamapper is available for telecom operators and national regulators for free for a limited time*

EASTON, PENNSYLVANIA , USA, November 20, 2018 / EINPresswire.com/ -- [LATRO Services, Inc.](http://LATRO Services, Inc.), an innovative market leader for Telecom Fraud Control and Revenue Assurance solutions, today announced [Versamapper](#), a brand new, first of a kind, free service for telecom operators to dynamically visualize physical locations of SIM Box fraud and relative revenue losses. Many operators do not have insight into the geographical distribution of bypass fraud problems and, as a result, implement inefficient control strategies. Bypass fraud controls are best optimized around the source of losses within the network. Versamapper allows telecom operators to gain quick overviews of their fraud problem, allowing them to take quick decisions toward eliminating the source of the problem. The service will be offered free of cost to telecom operators around the globe for a limited time.

Versamapper can be easily activated by [signing up on the LATRO website](#) and uploading the most recent fraud detection CDRs and associated network information to LATRO. Versamapper will then automatically analyze data, grouping related detections into individual localized operations with aggregated network density and financial impact metric calculations. LATRO provides a comprehensive and dynamic report of fraud operations –with actionable recommendations for the Mobile Operator or Telecom Regulator. Versamapper does not require any hardware or software installation.

“

Many of our existing clients tried the new and free Versamapper. The visual, comprehensive report helped these customers choose the right strategy which led to shutting down of major fraud operations.”  
*Don Reinhart*

Don Reinhart, COO, LATRO: “Our experience working with telecom operators for over a decade helps us create innovative solutions that take away pain points from fraud

and finance departments. Many of our existing clients already tried the new and free Versamapper and have given very positive reviews. The visual, comprehensive report helped these customers choose the right strategy for their fraud control program which led to shutting down of major fraud operations through our geolocation investigation services.”
