

# Arkansas Mesothelioma Victims Center Now Offers A Construction Worker with Mesothelioma or Asbestos Exposure Lung Cancer in Arkansas On the Spot Access to The Nation's Top Lawyers for Compensation Settlement Results

WASHINGTON, DC, USA, November 28, 2018 /EINPresswire.com/ -- The Arkansas Mesothelioma Victims Center says, "If you have recently been diagnosed with mesothelioma or asbestos exposure lung cancer, we want you to focus on your compensation and to call us anytime at 800-714-0303 so that we can provide you with on the spot access to the nation's top lawyers for compensation results. The last thing we want to see you do is hire a local car accident attorney who does not do mesothelioma or lung cancer asbestos compensation claims on a fulltime basis.

"We literally do offer direct access to the nation's most capable lawyers and they do not get paid unless there is a financial settlement, and our remarkable service is free."

The Arkansas Mesothelioma Victims Center fears that people who live in smaller cities or rural areas of Arkansas with mesothelioma or asbestos exposure lung cancer will discount the amount of financial compensation they could qualify for. In the instance of mesothelioma, the compensation could be close to or over a million dollars. A person with asbestos exposure lung cancer could receive hundreds of thousands of dollars as they would like to discuss anytime at 800-714-0303.

The group is especially worried that most people with asbestos exposure lung cancer will never receive a dime. Most people with asbestos exposure lung cancer do not realize they might be able to receive significant financial compensation-even if they smoked cigarettes. "One of the biggest clubs in the United States are victims of asbestos exposure lung cancer who never received a dime in financial compensation because they did not realize asbestos trust funds had been set up for them too as we would like to explain anytime at 800-714-0303."

The Arkansas Mesothelioma Victims Center's services are available to individuals throughout the state of Arkansas such as Little Rock, Fort Smith, Fayetteville, Springdale, Jonesboro, or Pine Bluff.

For the best possible mesothelioma treatment options in Arkansas the Arkansas Mesothelioma Victims Center strongly recommends the following three health care facilities with the offer to help a diagnosed victim, or their family get to the right physicians at each hospital.

Winthrop P. Rockefeller Cancer Institute Little Rock, Arkansas: <http://cancer.uams.edu>

Individuals with mesothelioma in the state of Arkansas could have been exposed to asbestos while serving in the US Navy or working at a power plant, at an oil or gas facility, as a plumber, a boiler technician, as an auto repairman, as an electrician, insulator, at a pulp and paper mill or at a construction job site. In most cases, the exposure to asbestos caused mesothelioma at one of these types of workplaces in the 1950s, 1960s, 1970s, or 1980s. Mesothelioma typically takes three to five decades to develop.
