

Gravitational Waves have Redefined Gravity and Proposed a Unified Theory of Special Connectivity

Was Sir Albert partially right? Has Young's Double Slit Experiment one more hidden mystery? Do we have a Unified Theory?

MUMBAI, MAHARASHTRA, INDIA ,
November 21, 2018 /

EINPresswire.com/ -- Prashant started with a small idea of dust with a vision to make human teleportation a reality. Since he didn't have a predefined road to his ambition, he needed to create one using unconventional methods. He moved on by redefining gravity in his paper titled "[Kaushal and Gravity](#)" which was published on 10 January 2018 by Journal of Physics and Astronomy [1]. That was a kicker and then he started working on wave-particle duality. He proposed a new way of doing an old experiment whose results thrashed the duality. His findings were published on 28 March 2018 by Journal of Physics and Astronomy [2]. He got some more publications until a German Publisher; Scholars' Press gave him an opportunity to write a book based on

his publications. That was a great opportunity and he wanted to make the best of it. He then proposed a unified Theory of Special Connectivity which, he believes, will lay the foundation of human teleportation. His book was published on 23 July 2018 and is available on various

Amazon and other websites across the world [3]. He also proposed a second version of Theory of Special Connectivity which includes a prototype for human teleportation [4]. Currently, he is looking for some funding opportunities so that he could make the impossible a possibility.

Kaushal and Gravity includes a new universal constant, Kaushal Constant and using this constant definition of gravity have been redefined”, Prashant quoted. This new definition is based on [Gravitational Waves](#) [1]. He said that “the paper titled “[Wave-Particle Duality?](#)” includes a new way of performing Young's Double Slit Experiment and according to the results, light is always a particle”. Also, “the book titled “Theory of Special Connectivity” propose a unified theory which is applicable to all the realms of science and technology and also explains quantum entanglement and many more such phenomenon whose

underlying theory is either not available or inappropriate”.

Gravitational Waves is a non-profit online source distribution website running by Prashant for free of cost. It is an informative website that showcases his achievements in term of research papers and published books. Also, it contains all the information about his start and end point which has one thing in common, Gravitational Waves.

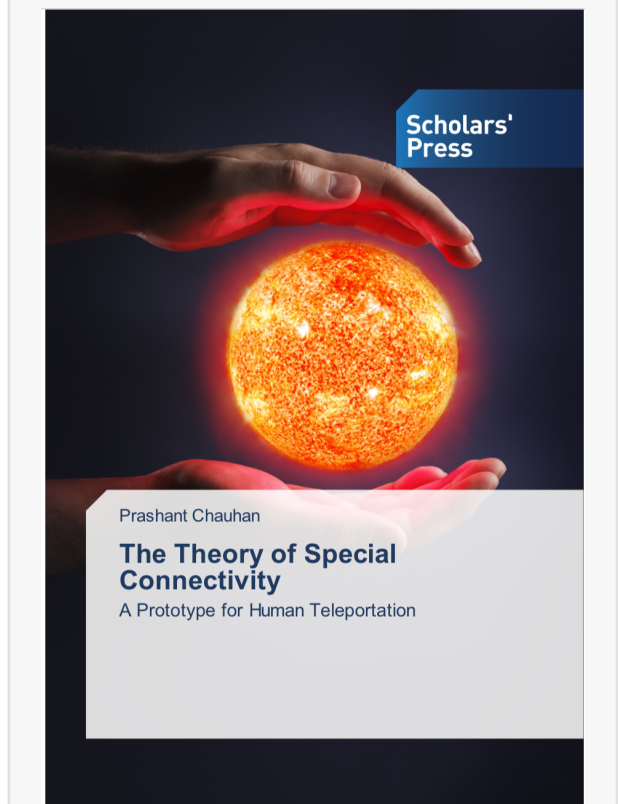

Prashant is a post-graduate fellow, studied Electronics and Communication Engineering from Jaypee Institute of Information Technology, India. Also, he is a Glasgow University dropout, went there for M.Sc. in Theoretical Physics. Currently looking for funding opportunities for his website as he wants to set up a lab where he can give birth to human teleportation using Gravitational Waves.

If you would like to have more information about this topic, please call Prashant at 8587960326, or email at info@gravitationalwaves.co.in. You can also visit his website at www.gravitationalwaves.co.in.
