

VOLANSYS to exhibit at CES 2019

VOLANSYS, a preferred IoT system integration company, demonstrates Smart Home, Connected Healthcare and Automation Testing capabilities at CES2019, Booth#42768.

SANTA CLARA, CALIFORNIA, UNITED STATES, November 29, 2018 /EINPresswire.com/ -- [VOLANSYS](#), a pioneering IoT system integration company, is excited to announce that it will be exhibiting at CES 2019, the global consumer electronics and consumer technology trade show for its 3rd year in a row. The event will take place from the 8th to the 11th of January, in Las Vegas, Nevada. VOLANSYS will be exhibiting in the Sands Expo at Booth #42768.

CES is the world's largest gathering of 4.4K+ exhibiting companies, 182K+ attendees, 1K speakers, and decision influencers. It serves as the global stage where next-generation innovations are introduced to the marketplace for all those who thrive on the business of consumer technologies.

With proven experience of engineering over 150+ IoT solutions including large-scale implementations for fortune 500 clients, VOLANSYS delivers a wide range of IoT products to consumer and enterprises across various industry verticals. The recent launch of the [Volanium](#) – IoT test automation framework, coupled with solutions such as Modular IoT Gateway, HomeBridge® Gateway, and hardware modules, clearly demonstrates VOLANSYS' strong competency in IoT services offerings.

During CES 2019, VOLANSYS will be showcasing live demonstrations of some of its turnkey solutions, such as:

Smart Home Automation

- Out of box smart home experience using HomeBridge® – certified production-ready ODM gateway solution.

Face Recognition Smart Access

- Smart Door Lock System integrated with the android application with AI-based Facial Recognition technology and ML based algorithm training.

Volanium

- Test automation framework suite to perform end-to-end testing of IoT solution across embedded devices, connectivity, cloud, web, and mobile.

Connected Endoscopy Device

- Portable and lightweight endoscopy device with wireless connectivity to stream and share live endoscopy process videos/images for remote healthcare

“OEMs and IoT service providers are embracing IoT technologies to launch innovative product lines and connected services with readily available sensor data, gateway platforms, cloud IoT platforms and data exchange services. At CES 2019, we look forward to engaging with business leaders and OEMs to bring most intuitive connected product designs and IoT solutions at lower cost and reduced time to market.”

-Dhruvsh Patel, Chief Technology Officer, VOLANSYS.
