

# Process Pigging Technology Specialists HPS Appoint New Agent for India

*Technoweld Enterprises will Represent HPS Product Recovery Solutions Throughout the Country*

NOTTINGHAM, NOTTINGHAMSHIRE, UNITED KINGDOM, December 18, 2018 /EINPresswire.com/ -- HPS Product Recovery Solutions, the leading experts in process and hygienic product recovery systems, have appointed Technoweld Enterprises as their official representatives in India.

Based in Mumbai, India, Technoweld Enterprises will work in partnership with HPS to deliver [pigging](#) and liquid transfer projects to companies throughout the country.

The company is also the official, and sole Indian supplier for HPS spare parts and accessories, including pigs, pig detectors, seal kits, valves, and other components.

“

We're looking forward to working alongside Technoweld Enterprises, to improve the efficiency, productivity, and profits of liquid processing companies throughout India”

*Gilbert Murphy*

Increase Presence in India

Although HPS already has an established customer base in India, staff in the business are looking forward to working with Technoweld Enterprises to grow the number of customers they have in India.

Gilbert Murphy, HPS founder, and CEO said,

“We are really pleased that Technoweld Enterprises are partnering with HPS to bring [the benefits of pigging](#)

technology to an even wider audience within the country. This partnership also allows the Indian market to have more direct access to our products and services”.

“HPS are the world's leading experts in pigging systems and liquid transfer solutions. Although we have worked with businesses in India for a number of years, Technoweld Enterprises' in-depth understanding of the Indian market combined with their technical expertise will support us in expanding and strengthening our product offerings even further”.

Soyeb Kapasi, Sales Manager of Technoweld Enterprises added,

“We are excited about this partnership and are proud to be working alongside the market leader in process pigging with a real focus on quality, innovation and customer support”.

"Pigging is an exciting technology with lots of benefits, such as increasing yields, speeding up changeovers and reducing waste.

"We're really looking forward to helping companies throughout India, in a wide variety of industries, to achieve their financial, operational and sustainability goals by recovering residual liquids from pipelines".

What is Pigging?

Pigging (or 'liquid product recovery'), uses a specialist projectile (the 'pig') to recover residual liquid from process pipelines. The result is increased yields, improved efficiency and higher profits. And because less product gets flushed away, it eliminates long, intense and inefficient cleaning cycles. In turn, this speeds up changeovers, reduces CIP chemical and effluent costs, saves water, and helps improve environmental sustainability.

Pigging technology is in wide use in many different industries. These include food and beverage, personal care, cosmetics, pet food, paint, homecare products, plus more.

Many of the world's largest process companies use pigging because the results are fast, and the benefits substantial. Payback is typically less than 12 months, delivering a high return on investment.

Gilbert Murphy concludes,

"We're looking forward to working alongside Technoweld Enterprises, to improve the efficiency, productivity, and profits of liquid processing companies throughout India".

The collaboration between HPS and Technoweld Enterprises will also speed up local communications, service support and response times.

About HPS Product Recovery Solutions

Founded in 1995, HPS Product Recovery Solutions increases its customers profitability by maximizing product yields, reducing waste, helping environmental sustainability and improving efficiency. This is through product-recovery (pigging) systems, liquid distribution and transfer solutions for processing industries.

Headquartered in Nottingham, UK, HPS has offices in the US and Australia, and global partners worldwide, including Brazil, China, Malaysia, and Thailand.

If you are based in India and wish to contact Technoweld Enterprises, you can find the contact details here for [HPS India](#).
