"Our 2019 Information Security Awareness for Healthcare is designed for all employees or contractors that have access to information systems"

ELC Information Security
High Impact Training for Employees

ST. PETERSBURG, FL, UNITED STATES,
December 3, 2018 /EINPresswire.com/

-- [ELC Information Security](#) has proudly announced that it is organizing a "2019 [Security Awareness Training for Healthcare](#)". The Florida based Security Awareness Training Company designs and offers a wide range of training courses and has proudly assisted its clients in various industries ranging from education to healthcare and from defense to retail sector. Moreover, the clients of ELC Information Security also include government agencies as well as several legal and financial institutions/organizations.

"Our 2019 Information Security Awareness for Healthcare is designed for all employees or contractors that have access to information systems and we are introducing this training with several customization options to fit the tailored requirements of our valued clients." Said Sam Carter, President of ELC Information Security, while introducing the course. "The information security landscape is rapidly transforming and we take great pride in offering customized information security trainings since 2007." He added.

In addition to its training courses, the company also offers a wide range of other services and customization options for its clients. Moreover, the company individually focuses on the tailored needs of each of its clients and then creates a training process that is engaging, flexible, relevant and concise. Moreover, the information security experts working in the team of ELC are highly focused on the shifting and rapidly evolving trends in the industry in order to offer its clients the optimum quality of services, training and consultation at all times.

"We are constantly adapting to the rapidly transforming information security landscape of tomorrow and are ready to help your workforce do the same." Said Sam Carter, while talking about the evolving information security landscape. "This upcoming training for healthcare comes with navigation options and completion options with grading, scoring and everything necessary to access the performance of participants." The President added. According to Mr. Carter, this upcoming course for the healthcare industry is designed to give the practitioners and professionals a complete understanding of the information security dynamics and it will play a major role in enhancing their on-job performance.

Some of the key topics in this Security Awareness Training for the healthcare industry designed by ELC Information Security include social engineering, appropriate use, phishing, passwords, browsing, email, messaging, ransomware, data leakage, insider threat and much more. Other strategic areas such as remote computing, appropriate use of personal devices, cloud computing and most importantly, protecting the information are also included in the key topics of this upcoming training. The company has been receiving phenomenal response from its clients for the previous trainings and this upcoming training is also expected to make a major impact in the industry.
