LOS ANGELES, CA, UNITED STATES, December 3, 2018 /EINPresswire.com/ -- Jim Moseley, CEO and founder of [Sun Fire Defense](#), wins Best of Los Angeles Award- "Best Fire Defense Product- 2018", according to Aurora DeRose, award coordinator for the "Best of Los Angeles Award" community.

The "BOLAA" community was formed three years ago and consists of over 4,400 professional members living and working in Southern California. It celebrates the best people, places and things in Los Angeles with a slogan "No Ads. No B.S. Only the Best."

"The mission of the community is to celebrate the best of Los Angeles, and allow its community members to connect with other members who share the highest standards of quality and integrity," expresses DeRose. "We're honored to include Jim Moseley of Sun Fire Defense into our BoLAA family."

A man of many talents, Jim Moseley has always been a passionate pursuer of knowledge and an entrepreneur. He earned his PhD in Political Science along with his Masters in Music from the University of Missouri, then followed his passion in music, becoming a professional musician. Jim performed with leading groups around the world and was the performer and Executive Producer on a Grammy-nominated album with Roger Williams and the London Symphony Orchestra. He was also a founding member and principal trombonist of the Crystal Cathedral Symphony Orchestra.

Jim's musical talents did not overshadow his business pursuits, however. Mr. Moseley founded The Moseley Group, an insurance agency focused on protecting assets of high net-worth individuals. During its growth he was nominated by President Reagan and Y.E.O., (now E.O.) as one of America's Top 100 Entrepreneurs, as well as Association of Collegiate Entrepreneurs. He later sold The Moseley Group to the CNA insurance company.

In 2013, Jim started Sun Fire Defense (previously Sunseeker Enterprises) and began working with some of the greatest minds in aerospace to create a more survivable fire shelter to save the lives of fire fighters. Mr. Moseley's long-standing relationship with NASA and their development of a high temperature fire blanket for space shuttle re-entry resulted in a material that could be used to insulate against heat and flames at extreme temperatures. Jim worked with experts to adapt this technology for use in wildland fire shelters and a roofing fabric for homes that stops heat

transfer and prevents burning embers from igniting roofing plywood or decking.

Jim has continued to advance Sun Fire Defense and innovate fire prevention technologies for residential and commercial applications, making never-before-seen breakthroughs in fire stopping capability.
