

Sagenext Expands its Service Portfolio with QuickBooks POS Hosting

Sagenext has finally launched QuickBooks POS Hosting on the cloud to provide seamless Point of Sale solution for retail chains and department stores.

AUGUSTA, GEORGIA, UNITED STATES, December 4, 2018 /EINPresswire.com/ -- Sagenext Infotech is proud to announce that they have launched [QuickBooks POS hosting](#) service for seamless POS processing. By hosting the QB Point of Sale software on virtual servers, retailers, supermarket owners, and restaurateurs get absolute flexibility and freedom to access and use all the tools, features and functionalities of the desktop version from anywhere, anytime using any device connected to the internet.

“

Sagenext Infotech, driven by world-class cloud hosting technology, has introduced QuickBooks POS hosting services in its service line-up to provide centralized control to multi-location retail stores.”

Vishwa

Being one of the most prominent cloud hosting providers, Sagenext has long been delivering the highest level of [QuickBooks hosting](#) services for all editions and versions of the software including Enterprise, Premier and Pro. And by introducing QuickBooks POS cloud hosting, Sagenext is committed to addressing the growing demands of modern retail chains.

Ever since its inception, QuickBooks Point of Sale application has been an undisputed leader in the retail sector. It comes loaded with umpteen features like

inventory management, sales tracking, credit card processing, and instant report generation. However, the desktop version has certain limitations; not only does it increase the dependency on local hardware and limits accessibility but also enhances the chances of data loss. Most importantly, the important data from different stores can't be accessed remotely.

This is where hosted QuickBooks POS solutions from Sagenext turn out to be a boon. It offers all the tools and features of the desktop POS version with the same interface combined with the benefits of the world-class cloud infrastructure. Sagenext cloud solutions ensure seamless synchronization between sales transactions and QB accounting application. Retailers can easily access data of multiple retail stores from one centralized platform along with managing sales, inventory and card processing. It translates to better performance of the business while working towards ensuring customer satisfaction.

“Our users have been asking for high performance yet pocket-friendly cloud solutions for QuickBooks POS software and we are more than delighted that we finally addressed their demand. Sagenext has finally launched a cloud-based POS service that offers easy synchronization with accounting application and simplifying billing process at retail stores and restaurants,” explained Jack Jasteen, CTO of Sagenext Infotech LLC at the launch event.

He further said “Our singular aim is to provide unparalleled cloud experience to our valuable customers and our QuickBooks POS cloud service is no different. By hosting the software on the cloud, clients can expect faster POS processing along with ensuring superior customer service. Users can access QB POS application and data from any location and track the overall

performance of their business whenever and wherever they wish.”

The company is also providing a free 15-day trial for QuickBooks POS hosting so that users can get a first-hand experience and make a well-informed decision.
