

Automotive Quality Expert Eduardo Correa teaches Seminar at UNIASSELVI University on organizational Quality Management

Quality Management Expert emphasized importance of quality management systems that involve the workforce, such as Six Sigma

LAURENS, SOUTH CAROLINA, UNITED STATES, December 4, 2018 /EINPresswire.com/ -- Automotive Quality Expert [Eduardo Cassano Correa](#) recently taught a seminar at UNIASSELVI University in Brazil (UNIASSELVI). The University has more than 185,000 students in graduate and postgraduate face-to-face and distance courses (EAD), and is one of the largest private institutions of higher education in Brazil. UNIASSELVI is present in all regions of the country, with more than 350 EAD poles and 10 own units of face-to-face teaching.

Quality Management Expert Eduardo Correa teaching seminar at UNIASSELVI University

With his wide experience in management acting in diverse organizations with different nationalities, [Mr. Correa](#) showed students how a manager can achieve better results by understanding and managing diversity among people such as age, sex, race, ethnicity and abilities. For the latter, he also spoke on the social inclusion of people with disabilities, adapting it to national legislation and including it in the Organization's Management System.

“

Cheaper, faster and qualitatively better competition is everywhere ... To ensure the competitive edge of a business, the Organization's Quality Management System is key”
*Eduardo Cassano Correa,
Quality Management Expert*

Organizational Management Systems have become crucial for the competitive survival because business compete no longer on a national but on an international basis. Cheaper, faster and qualitatively better competition is everywhere, especially in countries such as China and

South Korea. To ensure the competitive edge of a business, the Organization's Management System is key, with the goal of manufacturing on a “world-class” level assured by Quality Management, notes Mr. Correa.

One example in this regard is the Six Sigma system, originally implemented by Motorola. Six Sigma qualifications have become crucial for industry professionals. Six Sigma is a methodology that helps improve business processes by using statistical analysis. In order to achieve Six Sigma, organizational processes need to keep their defects to a maximum of 99.99966% opportunities.

Mr. [Eduardo Correa](#) has served on Six Sigma panels to evaluate the projects of his peers, and

thus has first-hand experience in Six Sigma. According to the American Society for Quality (ASQ), Six Sigma is a method that provides organizations tools to improve the capability of their business processes. This increase in performance and decrease in process variation leads to defect reduction, improved profits, increased employee morale, as well as increased quality of products and services. Hence, the ultimate goal of Six Sigma is to "Reduce the variation in Process". The focus of Six Sigma is to "Improve processes and increase customer satisfaction".

About Eduardo Cassano Correa

Eduardo Correa is a Quality Management Expert for the automotive industry, with particular expertise in Quality Management Systems (QMS) implementation. Specifically, he has substantial experience in Radiological Protection and Industrial Radioscopy. He implemented systemic and technical procedures to improve safety and quality issues at various manufacturing companies. Also, at one manufacturer as part of the corporate Steering Committee, he participated in the selection and approval for quality testing X-Ray equipment. His experience and competence in this area are expected to assist Alupress in implementing similar success strategies at its manufacturing site in South Carolina (USA). Mr. Correa is an expert in with particular experience in the aluminum die-casting process. He also holds numerous certifications and trainings related to manufacturing Quality. Mr. Correa holds a Degree in Mechanical Engineering, as well as a Master of Business Administration (MBA). He is a Member of the American Society for Quality (ASQ), a knowledge-based global community of quality professionals dedicated to promoting and advancing quality tools, principles, and practices in various industries.
