

Tx3 Services - New Tasktop Program Recognizes Select Partners Committed to Its Customers

Tx3 announced that its the first organization to obtain Premium Partnership status with Tasktop, a leader in Value Stream Integration and Management.

PHILADELPHIA, PENNSYLVANIA, UNITED STATES, December 4, 2018 /EINPresswire.com/ -- Tx3 today announced that it is the first organization to obtain Premium Partnership status with [Tasktop](#), a leader in Value Stream Integration and Management, whose integration solutions are an integral component of Tx3's Data Centric Computer Systems Validation (CSV) strategy.

As a Premium Partner of Tasktop, Tx3 both resells the Tasktop software and provides integration and deployment services to life science companies.

Tasktop's new Premium Partnership program recognizes those select organizations with a strong commitment to Tasktop customers, including having sales and pre-sales professionals that have completed Tasktop training. Tasktop's solutions automate and visualize the flow of product-critical information across the software delivery value stream.

CSV has historically been performed using documents. Paperless CSV solutions currently on the market mimic this process by digitizing documents; this improves the process yet fails to unleash the value of the underlying data. Tx3's data-centric approach reduces compliance risks by managing CSV data at a more granular level, while providing a more effective approach to enabling Agile transformation. Tasktop enhances this solution by integrating data across the DevOps tools landscape to accelerate flow across the value stream and optimize the validation process.

"With VERA as the common review and approval portal across the Dev/Ops tools landscape and Tasktop integrating data at the application layer, our clients see a significant step forward in improving the validation process while providing the ability to adopt best in class technology," said Jason Tepfenhardt, managing partner, [Tx3 Services](#).

"We are proud to welcome Tx3 as the first member of our Premium Resale Partner program," said Wesley Coelho, senior director of business development, Tasktop. "What makes Tx3 a

fantastic partner is our mutual commitment to open collaboration and shared excitement about how we help our customers win through improved Value Stream Management capabilities”

About Tx3 Services:

Tx3 Services is a leading regulatory compliance technology company, providing practical automated validation life cycle solutions which enable clients to meet regulatory requirements more efficiently and economically. Solutions range from large-scale service projects to specific IT quality and compliance management solutions, managed services, and hosted SaaS offerings. For more information about Tx3 Services please visit: <http://tx3services.com>

About Tasktop:

Tasktop, a leader in Value Stream Integration and Management, automates and visualizes the flow of product-critical information across the software delivery value stream from initial customer request to delivery and back through the customer feedback loop for continuous improvement. Some 57 integrations with software delivery tools enable organizations to leverage a best-of-breed tool network that also provides end-to-end visibility and traceability. The backbone of the most impactful Agile and DevOps transformations worldwide, the company's customers are the global leaders in financial services, insurance, government and manufacturing, many of whom are in the Fortune 100, including 11 of the top 25 banks in the world, the top six health plans and four of the top 10 US insurance companies.
