teams of experts in consulting, engineering and creative production strive to create business at our clients by offer one-stop access to professional services in business strategy, technological support and communication strategy.

#### About the Technology Fast500 Program

The Deloitte Technology Fast 500 is the pre-eminent technology awards program in Asia Pacific, and now in its seventeenth year, it includes nine Asia Pacific locations: Australia; China (including Hong Kong); India; Japan; South Korea; Malaysia, New Zealand; Singapore and Taiwan. Japan has been participating in the program since the first year. Combining technological innovation, entrepreneurship and rapid growth, Fast 500 companies — large, small, public, and private — span a variety of industry sectors from software to biotech. Fast 500 companies play in the SaaS, cloud computing, data analytics, and mobile sectors and are transforming the way we do business today.

#### About the Technology Fast 50 Program

Japan Technology Fast 50 is the Japanese edition of the ranking series organized by DTTL, an international public accounting and consulting firm that ranks companies among TMT industries based on their recent revenue (sales) growth based on a three-year period. Because the revenue growth rates are used as indices, the ranking indicates the fastest-growing companies regardless of their sizes. Entries are accepted from both listed and unlisted companies and they are automatically nominated for Asia Pacific Technology Fast 500 that encompasses all technology industry segments including hardware, software, communications, media, life sciences and clean technology.
