

# Easy Solar Add-On Drives 60% Growth for Portable Sanitation Business

*LunarGlo® solar powered porta-john lights credited with big boost in J&K Septic revenue; ease of installation and strong warranty*

ELKHART, IN, UNITED STATES, December 11, 2018 /EINPresswire.com/ -- LunarGlo's majority owner Judy Barton isn't getting much rest these days as she's been busy fielding inquiries and shipping their proprietary solar powered lights and vents to customers as far away as New Zealand, the Middle East and Europe.

Explaining what's driving this growth Ms. Barton said, "Word is getting out that LunarGlo® products give our customers a big competitive advantage in their local and regional porta-john market. For example, we heard from Kenton Brubacher at J&K Septic in New Paris, Indiana, that since they installed LunarGlo lights, their business has increased by 60 percent!"

Another LunarGlo® customer, AAA Porta Serve of High Springs, Florida added that "The lights not only provide a more comfortable environment for our customers, but lit toilets are much easier to clean due to the customers being able to see at night. Our team services units more quickly, everyone benefits from increased cleanliness and the lights are a great surprise for those "dreading" having to use a [portable restroom](#) at night."

“

Many of our LunarGlo customers are on Preferred Vendor lists which virtually eliminates competition from other 'non-lit' portable suppliers.”

*Rex Barton*

Rex Barton, the company's co-founder added, "Many of our LunarGlo customers are on Preferred Vendor lists which virtually eliminates competition from other 'non-lit' portable suppliers."

The LunarGlo® website explains that each lighting unit recognizes sunlight and automatically turns on the light with darkness, and then off when not needed. LunarGlo® Solar Lights are capable of providing up to 80 hours of continuous light from one full charge of a high-quality

Lithium-Ion Battery that's hard wired to eliminate any potential for vibration or shock related downtime. The oversized solar array will fully charge the battery within 16 hours of direct sunlight to power the four (4) LED bulbs emitting approximately 72-foot candles of reliable LED light.
