

CoinClaim.io and Ammbr.com Team Up To Launch Automated Crowdsale Bounty Program

Ammbr.com has chosen CoinClaim.io to run automated, viral bounty campaigns for their upcoming crowdsale.

SINGAPORE, SINGAPORE, December 19, 2018 /EINPresswire.com/ -- Communication and [transactional last-mile telecom infrastructure company](#), Ammbr.com, is teaming up with CoinClaim.io to conduct its [bounty program](#), ahead of its public crowdsale on 8 January.

Having recently released a new whitepaper and announcing their crowdsale, Ammbr are preparing to take their promising project into the next phase. The decentralised [wireless mesh network](#) built on blockchain technology is fast becoming a viable solution to "last mile" connectivity, which is bringing Internet access to people that live beyond the limits of where legacy ISPs provide infrastructure.

In fact, Ammbr have already developed three working portable, home and outdoor routers, which will use Ammbr's proprietary crypto asset, AMR, to trade connectivity in an autonomous market. Having secured sufficient private funding at the end of 2017, Ammbr have been developing their routers throughout 2018 and have now set aside 8 million tokens for their crowdsale.

CoinClaim.io, which has recently gone viral within the crypto community, is an automated, organic, viral marketing platform that rewards its 45,000+ users crypto tokens in exchange for promoting products on social media. Ammbr have recognized CoinClaim's resounding success since it launched in October 2018 and have struck a deal that they believe will grant them maximum exposure among CoinClaim's user base and beyond.

"CoinClaim has proven to be a revolutionary tool that has the power to change the face of social media marketing as we know it," Ammbr's founder and Managing Director, Derick Smith, said. "And not only is CoinClaim an excellent marketing platform, but their team also have an intimate understanding of the Ammbr products and vision and are also experts within the crypto community in which they operate."

"We've been monitoring the Ammbr project for some time, in awe of the incredible technology that they are developing and were very happy to get a call from them asking to collaborate with them for their crowdsale," CoinClaim CEO, Jeff Ownby remarked. "Our role in the growth of Ammbr's user base is essential to the success of their project and we are honored to be recognized by this incredibly promising project."

"The CoinClaim team are excited to showcase our platform's viability as a marketing tool for businesses around the world and this collaboration will play a major role in our growth in this partnership. There are some incredibly exciting times ahead for us."

Companies using the CoinClaim platform are able to create campaigns on the dashboard where they decide on tasks for users to complete, such as sharing content on Facebook or Twitter, and how many company tokens users will be rewarded for completing these tasks. The system

calculates the amount of company tokens required for the campaign, and automatically adds them to the user's wallet after completion of campaign.

Additionally, users earn CoinClaim's internal token, CLM, for completing tasks such as logging in daily or weekly, completing company Coin Claims, birthdays, holidays and more. Users can earn even more CLM by referring friends.

About Ammbr:

The Ammbr Foundation is based in Singapore, and bears primary responsibility for the ordered development of the global Ammbr Mesh Network. For more information about Ammbr, please visit www.ammbr.com.

Note to editors: Ammbr is pronounced the same as "Amber". "Ammbr" refers to the Ammbr Foundation and Ammbr products and technology.

About CoinClaim:

CoinClaim is a Chicago-based automated cryptocurrency bounty program. Users can share content from participating companies on social media in exchange for CoinClaim's internal token, CLM, as part of a new strategy for viral organic growth among real users. For more information about CoinClaim, please visit coinclaim.io.
