

for over 8 years. We have been supplying product producers, research developers, hemp and recreational growers, medical professionals and individuals with complete easy to use TLC testing kits and supplies specifically for cannabis plant material and products made from cannabis plant material.

These testing kits are sold worldwide and are completely FDA, cGMP, UNODC, USP and HEALTH CANADA Approved. You can test for THC, CBG, CBD, CBN all in one test. Any sample with more the 1% cannabinoid in it will be visible on the tlc plate.

Hemp Growers you will see a blank spot were the THC marker would be, that will tell you that you have less than 1% THC which is the current requirement for CBD medicines.

We currently have teachers in California, MI, Oregon and Canada to provide certification training for product producers and those who just want hands on training, visit our website for a ton of information and a instructional video, all sales are through our online store. THCTESTKITS.COM

People have created complete labs just using these kits (there is a complete mini lab available) in areas that have no labs for long distances, but the state or country require testing, and they report great success.

Now is the time to be part of this great new industry were everybody gets a chance to create their own business niche. We have been helping that cause with very low priced quality supplies and testing kits with consistent and accurate results that can be compared to any qualified GC machine as noted in High Times Magazine and other media outlets.
