

Silently transcribing during sensitive and rushed situations allows clinicians more time to focus on patient care

Accurately document patient information without being overheard by others while additionally eliminating all background noise.

NEW YORK, NEW YORK, USA,
December 12, 2018 /
EINPresswire.com/ -- Voice technology in healthcare is not yet the ubiquitous application that we believe it will soon become. The major concerns are patient privacy, HIPAA compliance, potentially leaving confidential information unprotected and the challenge of clear voice communication in a noisy and busy clinical setting, particularly when complex medical vocabulary is required.

Industry best noise cancelling, speech recognition microphone

Many physicians use voice technology for clinical decision support and documentation in their office or home however they are much less inclined to do so in the presence of their patients.

There is a practical and affordable solution to this problem.

“

Using a Stenomask eliminates the background noise in our busy workplace while simultaneously providing privacy when using speech recognition. Now there is no need for a private room or office.”

K. Somner, B.C. Ministry of Health

Talk Technologies engineers and manufactures specialized microphones ([stenomasks](#)) that allow clinicians to use speech recognition and verbally communicate in public without anyone overhearing them. Our voice isolating technology enables private transcription and verbal communication while simultaneously eliminating all background noise.

Stenomask functions like a sound-booth only in pocket sized form, guaranteeing clear voice communications in loud and busy clinical settings.

Advantages:

- Complies with HIPAA privacy and security rules
- Decreases potential security risks and protects the privacy of individuals' health information
- Lightweight, affordable and road worthy durability
- Compatible with all speech recognition software including Dragon medical
- No start up time or learning curve, simply plug in and go
