The research survey considers hundreds of potential candidates. The annual list of 100 Great Supply Chain Partners features a select group of companies whose customers recognize them for providing outstanding solutions and services. It's the fourth time that Acuitive has been recognized in the annual survey, which is in its 16th year.

"This recognition is the direct result of a customer stepping

up and sharing their experience with our platform, it's integral role in their supply chain strategy, and the value we deliver," said Phil Marlowe, founder, CEO and chief logistician of Acuitive Solutions. "We're thrilled to be honored with an award founded in the integrity of our customer's experience, and how we help them balance advance planning and supply chain agility for multi-mode international transportation."

SupplyChainBrain assembles the list after conducting a six-month online poll of supply chain professionals who nominate vendors and service providers whose solutions have made a significant impact on their company's efficiency, customer service and overall supply chain performance.

"For 16 years running, SupplyChainBrain has published our much-anticipated list of 100 Great Supply Chain Partners," said Brad Berger, publisher of SupplyChainBrain. "This year's nominees were competitive and inspiring - coming from all sectors of supply chain management."
