

# Dragon Medical Speech Recognition Microphone Allows Clinicians to Transcribe Anywhere in Complete Privacy

*Accurately document patient information without being overheard by others while additionally eliminating all background noise.*

SEATTLE, WASHINGTON, USA, December 14, 2018 / EINPresswire.com/ -- Voice [technology in healthcare](#) is not yet the ubiquitous application that we believe it will soon become. The major concerns are patient privacy, [HIPAA](#) compliance, potentially leaving confidential information unprotected and the challenge of clear voice communication in a noisy and busy clinical setting, particularly when complex medical vocabulary is required.

Industry best noise cancelling, speech recognition microphone

Many physicians use voice technology for clinical decision support and documentation in their office or home however they are much less inclined to do so in the presence of their patients. There is a practical and affordable solution to this problem.

“

Stenomask is an effective tool that eliminates background noise in our busy workplace while simultaneously providing voice privacy when using speech recognition for clinical documentation.”

*K. Somner, B.C. Ministry of Health*

Talk Technologies engineers and manufactures specialized microphones (stenomasks) that allow clinicians to use speech recognition and verbally communicate in public without anyone overhearing them. Our voice isolating technology enables private transcription and verbal communication while simultaneously eliminating all background noise.

Stenomask functions like a sound-booth only in pocket sized form, guaranteeing clear voice communications in loud and busy clinical settings. Your documentation can now be captured anywhere in complete privacy.

Advantages:

- Complies with HIPAA privacy and security rules
- Decreases potential security risks and protects the privacy of individuals' health information
- Lightweight, affordable and road worthy durability
- Compatible with all speech recognition software including Dragon medical
- No start up time or learning curve, simply plug in and go
- Doctors that use clinical speech recognition are 23% happier

They feel more confident about technology and have a better experience  
They move freely, spend more time with patients and can go home on time

Privately transcribing anywhere is an antidote to burnout. It helps doctors feel better about documentation, more satisfied and freer to practice as they see fit.
