SystemDomain and Optimal IdM Partner to Provide Professional IAM Services

SystemDomain and Optimal IdM partnership will offer professional IAM services and health check assessments for customers.

CHICAGO, IL, USA, January 3, 2019 /EINPresswire.com/ -- SystemDomain, Inc, a Chicago based leading global information technology and consulting services company and Optimal IdM, a global provider of innovative and affordable IAM (Identity Access Management) solutions, today announced a global services partnership agreement.

The partnership augments Optimal IdM's award winning product line in the IAM space and SystemDomain's professional services in Cloud and Cybersecurity to bring a complete managed service offering for IAM.

"This collaboration highlights our strong and growing relationship with Optimal IdM." said Shubhi Garg, CEO, SystemDomain, Inc. "The partnership creates a center of excellence with a dedicated focus on Optimal IdM's enterprise software products that provide broad capabilities and solutions for a superior customer experience in IAM." Garg continued, "This alliance also creates a strong differentiating edge to our existing IT professional services portfolio in Project Management and Identity Solution Assessments."

"This alliance with SystemDomain creates a logical extension of Optimal IdM's managed services offering to onsite consulting, integration, project management, and security assessments," said Chris Curcio, VP of Channel Sales and Partnerships at Optimal IdM.

The Optimal IdM product and service portfolio includes a full-featured cloud Identity as a Service (IDaaS) platform named The OptimalCloud™. The OptimalCloud provides universal single-sign-on (SSO), Federation Brokering, MFA Services, authorization enforcement, audit and reporting services. It can be combined with the exclusive power of Optimal's Virtual Directory to solve today's unique identity, cybersecurity, regulatory and compliancy issues.

Optimal IdM's on-premise offerings include the award winning Virtual Identity Server (VIS), which provides a secure, policy driven SSO solution incorporating Federation Services, and a single manageable console for initial authentication security policies. It provides a single view of hundreds of Active Directory forests, LDAP directories as well as other data repositories like SQL, Oracle and many others. VIS seamlessly integrates with Microsoft applications including SharePoint, Office 365 as well as on-premise legacy applications. VIS is currently integrated with more than 5,000 applications and more are added every day.
