

Platinum now offers STO services

Platinum is already a global leader in providing one-stop solutions for ICO projects. Now all our services are available for STOs.

TOKYO, JAPAN, December 15, 2018 /EINPresswire.com/ -- [Platinum](#) has always been in tune with market vogues. Staying true to our philosophy of spotting trends and providing expertise for them, we are glad to announce that we are now offering comprehensive services for Security Token Offerings, or STOs.

These days, we are witnessing an upheaval in the crypto market. The dynamic regulatory landscape has forced positive changes. STOs are becoming the new norm today. This fundraising process retains the dynamism of an ICO and yet adheres to the compliance requirements – both present and future – of regulatory authorities. Bringing in more corporate accountability, STOs are bound to attract a larger number of mature businesses and investors to the crypto market.

“

We wish to remain at the forefront of the crypto revolution. We will leverage to offer the same high level of STO services that clients have come to expect from us over the years.”

Anton Dzyatkovskiy, Co-founder of Platinum

We believe that these are exciting times for the market. STOs will bring in a fresh influx of capital, not only from retail investors who will feel more confident about contributing to meaningful projects, but also from institutional investors who will wish to take advantage of this novel class of assets.

“We wish to remain at the forefront of the crypto revolution. With changing times, we are adapting ourselves to stay in sync with market trends. Our diverse team has deep industry insight, relevant expertise and diverse experience which we will leverage to offer the same high

level of STO services that clients have come to expect from us over the years,” said Mr. Anton Dzyatkovskiy, Co-founder of Platinum.

Platinum is already a global leader in providing one-stop solutions for ICO projects – from marketing, PR, compliance, consultancy, audit to legal. Extending our services, complemented with our industry expertise, to STOs, we wish to emphasize that we shall continue to provide ICO services and our new focus on STOs will have no adverse effects on our existing or future relationships with any of our clients.

About Us
