About iSkysoft

iSkysoft is a technology company that was founded in 2004 by a group of young individuals with the passion to solve problems faced by people on a daily basis on either a Mac or Windows computer. The company was officially established in 2007 by the launch of their product "Video Converter". Although it was primarily aimed at just the production of Mac software, they eventually ventured into the development of Windows programs as well. In 2012, they developed a PDF editing software known as iSkysoft PDF Editor Pro to cater for the unending needs of Mac users for a PDF editing software. A year later they started developing programs to help users with the recovery of files from a wide range of devices starting from Mac, external USB drives and mobile devices. iSkysoft has successfully been installed over 9 million times by users from over 230 countries around the globe.
