

Leading GCs, trades, architects, owners & modular partners join largest dedicated prefab & modular construction summit

Advancing Prefabrication '19 brings together owners, architects, GCs, trades & modular partners to share best practices & explore the potential of offsite work.

DALLAS, TX, UNITED STATES, December 17, 2018 /EINPresswire.com/ -- [Advancing Prefabrication 2019](#) will bring together leading owners, architects, GCs, trades and modular partners to share best practices and explore the future potential of offsite work.

With the perception of prefab and modular changing fast, and the rapidly increasing rate of adoption across the industry, it's imperative to equip your team with the best tools and processes to stay ahead of the curve. We will discuss optimizing set-up, planning, operations, and install of everything from single and multi-trade assemblies through full volumetric modular buildings.

Much of the success of offsite construction is reliant on efficient planning and consideration from day one, and this is a great chance to understand how owners and architects are improving their efforts up front, and what they need from project partners to support these changes.

“

This was one of the best conferences I have ever attended. Organization and timeliness was upheld throughout and the material was extremely thought provoking and relevant.”

Project Estimator, Haselden Construction

January 28-31, 2019 | Dallas, Texas

Innovating Practices to Increase Labor Productivity, Reduce Costs & Consolidate Schedules

With three tracks of content and more workshops than ever before, the 2019 conference offers fantastic opportunities to tailor your three days to the specific interests of you and your team.

Here is just a sample of the insights and discussions that you can look forward to:

- Hear from leading owners paving the way with prefab and modular including Intel, Google, Marriott, Universal Health and more...
- Understand how the leaders at PCL Agile are exploring more prefabrication opportunities deliver maximum value

- Explore how experienced architects from companies such as Cannon Design, Stantec, Group2Architects and more ensure that they design to the right level of detail and high spec from day one to avoid costly redesign later on
- Learn how the Prefab Managers at Rosendin Electric quickly and efficiently engage, train, and set up the right culture among field teams to increase labor productivity
- Discover the ways that the VP Manufacturing at Prescient, Director of Critical Process Systems at M C Dean, and VP Innovation at Turner Construction are drawing their teams together and achieving full collaboration with both technology and enhanced workflows

Plus, you'll have the chance to explore the cutting-edge practices and technologies that are going to drive prefab into a new age.
