

Introducing the Newly Updated Version of Online Food ordering platform

COIMBATORE , TAMILNADU, INDIA, December 18, 2018 /EINPresswire.com/ -- POFI Technologies—Shopurfood is an online platform for food ordering and delivery launched by POFI Technologies. Shopurfood food delivery platform is updated with new and exclusive features with a high motive to connect customers with restaurants seamlessly. Newly updated Shopurfood offers range of features like “Live tracking”, Unique Commission, Restaurant /Delivery boy availability status, Individual earnings, Pre order, Table dine-in, Advanced filters, Secured payment gateways and more. Shopurfood is built with intuitive user friendly design to make users order their foods easily from restaurants. The process of taking online food orders and delivery is made simple with our platform. The new updated web version development and design work started after team of analysts and researchers submitted detailed analysis report.

Team inputs, Website analysis, Client feedback and online feedback played a major role in initiating the process. After going through it, Mr. Rajesh Kumar CEO & Founder of POFI Technologies, created a team to undertake website redesign & development enhancements. Mobile and user experience focused updates took months of hard work to complete. Project manager gather data to make user experience and conversion improvements on POFI Technologies. Our recent website redesign and development found base in similar research work and was undertaken after doing comprehensive planning and team discussions. Our web design and development process is very detailed when we work on client projects. This guarantees success to our client on [food ordering platform](#).
