

Glosfer Targets Enterprise Market With HYCON Enterprise Platform

- Glosfer Holds Inaugural 'Glosfer Partner Day'

SEOUL, KR, December 20, 2018
/EINPresswire.com/ -- Glosfer held its inaugural 'Glosfer Partner Day' event on December 12 and formed a partnership with 14 companies to build a blockchain market in the enterprise and public sectors with its own blockchain platform, HYCON Enterprise Platform.

Glosfer invited the CEOs and other executives of the 14 partner companies, including DaeBo Communication and Systems, KL-Net and KCC Information & Communication, to explain the company's strategies for targeting the enterprise blockchain market as well as to introduce its in-house developed HYCON Enterprise Platform.

Previously, Glosfer successfully accomplished several projects, including the Nowon Cash local cryptocurrency system, blockchain-based business proposal evaluation system, electronic contract service and blockchain-based music platform UpMusic. The company also took part in one of the six major government-led pilot projects, the inter-terminal container transfer documentation system project, and succeeded in applying blockchain technology to port logistics.

The HYCON Enterprise Platform was developed based on the HYCON mainnet to safely provide data transparency for enterprises and public institutions. The platform will offer what enterprises consider top priority but have not been readily provided by existing blockchain solutions, such as stability, performance and technical support.

CEO Taewon Kim of Glosfer said that "Blockchain technology for the enterprise market must cater to the market's needs and requirements and Glosfer will target the enterprise market with the HYCON blockchain technology, verified by global users." He added that "[We] believe creating and expanding the enterprise market together with our partners is the best way to dominate the market."
