

Offshore Energy UK Limited Announces Launch of New Website

New Design to Improve Visitor Experience and Engagement

LONDON, UNITED KINGDOM, December 30, 2018 /EINPresswire.com/ -- Offshore Energy UK Limited, a leading provider of project management, engineering and lifting management to the oil & gas, subsea telecommunications and renewables industries announced today the launch of its newly designed website (<http://www.oel-uk.com>).

“We are pleased to debut the newly designed company website, which is part of a strategy to improve our digital presence. We hope our customers, clients, partners, media and visitors enjoy learning more about the breadth of the services Offshore Energy can provide, and that the new website helps showcase the company’s commitment to excellence.” says Richard Turnbull, Offshore Energy’s MD.

The revamped website features streamlined messaging, simplified design, improved functionality and enriched content areas to create the best possible experience for visitors. The site has been designed using the latest technology, so the site is compatible with today’s browsers and mobile devices in a fully responsive and mobile-friendly layout.

The ‘Contacts’ page provides information on how people can get in touch with the company at any of its regional offices in the United Kingdom, Canada, Angola, South Africa or the Mediterranean.

About Offshore Energy UK Limited

Offshore Energy offers integrated project management and solution-based engineering services to the oil & Gas, subsea telecommunications and renewable energy industries worldwide. We plan, design and deliver projects in challenging environments, creating the most effective and efficient solutions for our clients.

Our personnel are highly competent and have significant industry experience. Engineering is at the heart of everything we do, and our engineering team is key. This engineering focus adds value to projects by exercising the rigour necessary to mitigate and manage risks, which facilitates innovative and creative thinking needed to deliver complex, demanding and often ground-breaking projects.

Our engineers can be involved throughout the life cycle of your project, from initial FEED through kick off, design, onshore planning, offshore installation and project completion.
