

Four weeks until the 12th Annual Mobile Deployable Communications Conference in Poland

SMI are delighted to announce the Mobile Deployable Communications conference, returning to Warsaw, Poland on the 31st January and 1st February 2019.

LONDON, LONDON, UNITED KINGDOM, January 2, 2019 /EINPresswire.com/ -- With the ability to effectively communicate driving the tempo of the modern battlespace, the need to know 'where I am, where my friends are and where the enemy is' remains fundamental for the success of any operation.

This critical requirement has become ever more vital as militaries deploy in degraded environments to tackle asymmetrical threats and electronic warfare technologies which risk disrupting the allied ability to effectively operate.

The key topics that will be discussed at the event include SatCom on the move, Software defined radios, Ground terminals and network-enabled capabilities, Standardising C4ISR networks, Building tactical CIS networks and maximising data telemetry resiliency, Operational feedback, and Research and development.

[The brochure with the full two-day agenda](http://www.mobiledeployable.com/einpress) can be downloaded from the event website, at <http://www.mobiledeployable.com/einpress>.

This highly anticipated event boasts strong support of the Polish Armed Forces, who will be in attendance and provide a host nation opening address.

Host Nation Presenters include:

- Chairman: Colonel Grzegorz Szmit, Chief of the IT Infrastructure Branch J6, Polish Armed Forces
- Brigadier General Robert Drozd, Chief of the Command and Control, J6 Directorate, Polish Armed Forces
- Lieutenant Colonel Bartosz Jasiul, Head of Cyber Security Laboratory, Military Communications Institute
- Dr Joanna Sliwa, Head of C4I Systems, Military Communications Institute

With only four weeks remaining, [register soon to guarantee your place](http://www.mobiledeployable.com/einpress), at <http://www.mobiledeployable.com/einpress>.
