

Verathon Launches All-New GlideScope Core Airway Visualization System

BOTHELL, WASHINGTON, UNITED STATES, January 3, 2019 /EINPresswire.com/ -- Verathon Launches All-New [GlideScope Core](#) Airway Visualization System

Verathon, a global leader in airway management devices, has announced the debut of GlideScope® Core™, the most comprehensive and flexible airway visualization system available for video laryngoscopy, bronchoscopy and multimodal airway procedures. As the first and only airway visualization system to offer live, simultaneous picture-in-picture imaging, the all-new GlideScope Core gives healthcare professionals the power to see more and do more. With dual connection ports, GlideScope Core is compatible with the full line of GlideScope laryngoscope products as well as bronchoscopy visualization tools which will be added to the GlideScope portfolio. GlideScope Core makes the integration and use of these tools and systems seamless.

“We believe in giving healthcare professionals immediate access to the tools they need, as well as a clear, detailed view of the airway they are managing.” stated Earl Thompson, President of Verathon. “With the launch of GlideScope Core, and our ongoing investment in compatible bronchoscopy tools we continue to expand our position as the airway visualization partner of choice for the clinical community.”

GlideScope Core is built around a high-definition 10” touchscreen monitor, offering users crystal-clear views of the airway. Its still image and video capture features, combined with video playback and image gallery, can aid in user training and simplify record retainment. Unique new features, such as display of SpO2 and 180 degree image rotation, helps ensure top-quality treatments. In addition, GlideScope Core offers a wide range of ingenious workstation design features that add up to a more intuitive experience for the user. All tools are neatly organized and close at hand, while an adjustable arm enables users to position the monitor over the patient, providing optimal viewing in their direct line of sight.

More information about GlideScope Core and the entire Verathon portfolio of airway management products can be found at www.verathon.com

About Verathon

Verathon is a global medical device company focused on supporting customers by being their trusted partner, delivering high-quality products that endure over time and ensure clinical and economic utility. Two areas where Verathon has significantly impacted patient care, and become the market leader in each, are bladder volume measurement and airway management. The company’s BladderScan portable ultrasound and GlideScope® video laryngoscopy systems effectively address unmet needs for healthcare providers and meaningfully raise the standard of care for patients. Verathon, a subsidiary of Roper Technologies, is headquartered in Bothell, Washington, and has international subsidiaries in Canada, Europe and Asia. For more
