

Bella IMC Awarded 6,500 Cabinet Project Using Lockdowel Fastening to Meet Aggressive Timelines

Lockdowel screw-less, glue-less assembly helps Bella Innovative Modern Cabinets win and fulfill 6,500 cabinet project on-time and on-budget

HUNTERTOWN, IN, UNITED STATES, January 7, 2019 /EINPresswire.com/ -- [Bella IMC™](#) has won the cabinet construction component for a 25-story, multi-family luxury housing unit in the Washington D.C. metro area. The 6,500 cabinet complex is to be completed by March 12 using the revolutionary tool-less, slide-to-lock [Lockdowel](#) fastening system, that allows for 60% faster cabinet manufacturing production and assembly.

Previously an overseas cabinet company was chosen for the job, however they were failing to meet the builder's construction deadlines, allowing Bella IMC to be the optimal choice in awarding the winning bid. When the construction project manager visited the Bella IMC facility in November, he was amazed with the high standard of quality and workmanship of the company's cabinetry, and pleased with the modern European look desired for the complex.

"Because of the quick turnaround we achieve with Lockdowel we are going to complete this job on time and possibly before the deadlines," Grant Weber, Bella IMC Director of Operations says. "Lockdowel surpasses all other fastening methods in speed of construction to enable us to compete against overseas companies."

About Bella IMC™

Bella IMC (Innovative Modern Cabinetry) is simplifying and leading the way with cabinet industry professionals on a new idea of buying and selling cabinets with unparalleled product quality and versatility that can be Assembled-On-Site (AOS), enabled by tool-less Lockdowel snap-in fastening. Bella IMC allows for quick changes in looks and designs by easily replacing the doors and hardware. Combine this with cost savings and customers now have control of their cabinetry dreams.
