Founder of Estala Skin Care, Esta, was involved in a serious car accident in 1987. For 30 years, she underwent numerous surgeries to repair damage, which understandably left her facial skin scarred and in an overall poor state. She tried different creams and lotions in an attempt to improve her skin's quality but nothing had the impact she was looking to achieve. She

then came upon some very unique products that were compounded in a pharmacy specifically for her skin. As she used these products, her skin finally began to heal properly. The products began to restore a more youthful appearance. She wanted others to be able to experience the benefits of these wonderful products offer, and so the Estala Skin Care line was created.
