# New Tool Helps Texans Find Propane

*Finding propane just got easier!*

AUSTIN, TX, USA, January 14, 2019 /EINPresswire.com/ -- The Texas Propane Gas Association (TPGA) has developed a tool for consumers to connect to propane retailers in their local areas through a Find a Propane Retailer tool at PropaneTexas.com.

Consumers from all over the Lone Star State can visit https://propanetexas.com/ and search for a TPGA member propane retailer by clicking on their county in the map of Texas, typing in their county or choosing from a list of counties from a drop-down menu.

"Propane is a clean, abundant, domestic energy found right in here in the Lone Star State, where Texas houses the largest propane storage in the world," states Bill Van Hoy, the association's Executive Director.  "The Texas Propane Gas Association is excited we help connect consumers with our members who can help provide them with their energy needs, whether it is for their home, RV, grill or truck."

Not only does the site connect consumers to member propane outlets, but it's informative, too. Consumers looking to build, buy or remodel a house can discover all the ways propane can benefit them inside and outside the home including home heating, cooking, water heating, outdoor living and backup generation.

About the Texas Propane Gas Association
Founded in 1944, The Texas Propane Gas Association (TPGA) is a non-profit, state trade association helping advance the propane industry for over 75 years. For information about the Texas Propane Gas Association, please visit www.txpropane.com.
